ABSTRACT

This K-12 sequential curricular program in drug prevention was developed by teachers in six participating counties in Florida, as a result of the Drug Abuse Education Act passed by the Florida Legislature making such education mandatory in the public schools (K-12) beginning in the 1971-72 school year. This program is based upon the creation of behavior involving the realms of cognitive, affective, and normative domains, which is hoped will result in the individual's abstinence from the use of drugs. The program was not written by "experts" in the field of drugs and narcotics nor by a professional writer, but by experienced classroom teachers. It was developed as an initial step in devising a curriculum program and is also offered as a basis for a community action program. Generally, it is written in outline style and organized according to three areas: content, suggested student activities, and resources and materials. Extensive appendixes include a list of slang terms, films, sources, a student dialogue on the use and abuse of drugs, supplementary materials, directory of health services and agencies, school policies, Florida statutes, etc. A bibliography of books, journals and pamphlets follows. INTRODUCTION

There is little doubt that the illegal use of heroin, marijuana, and LSD in this country is on the increase by nearly every segment of our population. However, abuse of illegal chemical agents has increasingly come to involve younger persons. For example, half the known addicts in the United States are under age 30, and growing numbers are under age 20. During the last few years, there has been a veritable epidemic of heroin abuse in those 16 years and under; with increasing frequency heroin is used by affluent youngsters. Marijuana is a drug that has also caught the fancy of the young. Studies conducted in 1966-1969 indicate that about 15 per cent of all college students use marijuana on more or more occasions, and about 10 per cent of all high school students use marijuana on one or more occasions. The use of LSD by college students has been placed as high as 15 per cent in California and 7 per cent in Connecticut to 5 per cent country-wide. There also appears to have been a profound increase among school-age youth in illicit use of stimulants of the amphetamine variety and depressants of the barbiturate family. A recent (1970) survey of college students in Florida conducted by the Attorney General's office revealed that more than 2,250 students drop out of college each year because of heroin addiction; and 20 per cent of the students in Florida universities, colleges, and junior colleges are regular users of marijuana (a rather alarming increase over the 1966-1969 figures).

Many agencies in society have studied the drug abuse problem both superficially and in depth, and numerous proposals have been made for the solution of this problem. An overwhelming majority of these proposals take the form of legislation which increases penalties for drug abuse or provides for the rehabili-

tation of drug users to society, both of which have proven to be ineffective and expensive and may to some extent even contribute to the magnification of the problem. Other proposals have been forwarded which suggest that "something" should be done in our public schools regarding drug education. These proposals have been somewhat vague and general in nature since they are made by those who are not able to be specific due to a lack of expertise and a lack of accurate data by research experts with respect to what is possible regarding curricular innovation in drug abuse education in the public schools.

Most communities in Florida have come to the awesome realization that students 'must' be educated to the dangers associated with the use and misuse of drugs and narcotics. It is another thing entirely, however, for the schools in the communities to provide the right kind of education relative to the drug problem. The one-shot program, utilizing resource people such as state or local police, druggists, medical doctors, addicts or ex-addicts, social workers, etc., in an assembly program once a year is of little or no value. Also doomed to failure are the kinds of programs designed by relatively uninformed teachers who are assigned the job of including a few remarks about drug addiction in their programs while they also talk about alcohol, tobacco, communism, and sex. Teachers who know less about drugs than their students are marked for failure. Anything less than a well-planned, coordinated, implemented program will no doubt range from ineffective to catastrophic.

Recently, the Florida Legislature passed a Drug Abuse Education Act making such education mandatory in the public schools (K-12) beginning in the 1971-72 school year. Inherent in this bill was the realization by Floridians that in the final analysis there is only one way to solve the drug abuse problem; and that is to reach the minds of the youth who are relatively untainted by the

prevalent attitudes which condone, even encourage, the abuse of drugs. The public schools provide the only reasonable vehicle for reaching the developing minds of youth; and since such schools are already in existence, the cost of developing such a program should be negligible.

Educators cannot take the attitude that any meager effort is good, or that once the subject is introduced through an assembly speaker the "law has been covered" or that a haphazard "crash program" will do the job.

It was felt that the solution to the problem of drug abuse was to be found in a curricular program introduced in the elementary school, the middle school, and the high school. This program is based upon the creation of behavior involving the realms of cognitive, affective, and normative domains which is hoped will result in the individual's abstinence from the use of drugs. In addition, a significant aspect of the solution includes a definition, on the part of the teaching profession, of the type of behavior which is desirable, and the development of educational experiences which contribute to the development of that behavior.

The sequential curricula program contained herein, beginning at the kindergarten level and extending through grade twelve, was developed by teachers in the six participating counties who teach at the specific levels for which they are written. It was not written by "experts" in the field of drugs and narcotics nor by a professional writer. Rather, it was drawn up by experienced classroom teachers who know the needs of a particular level, the peculiarities of specific age groups, and certainly, and most important to the secondary level, by people who are knowledgeable in a subject discipline and in attitudinal development having received special training to teach in these areas.

The program began at the Regional Conference on Drug Abuse Education (Novem-

ber, 1970) through introducing regional educators (a seven-county area) to suggestions as to how a curricular program on drug education might be developed and specific involvement of teachers in the formulation of statements of desirable behavior which could be reduced to behavioral objectives necessary to the development of the curricular program for the prevention of drug abuse.

From this meeting developed a proposal for Operation Prevention to be funded by the six participating counties. Each of these counties felt the proposed program was needed in their schools and approved the plans for Operation Prevention. A meeting was then held involving representatives from each county, the University of West Florida and the Florida State Department of Education. After the meeting each county coordinator returned to his county and selected a number of outstanding teachers from grades K-12 who were willing to cooperate in developing a drug abuse education program.

The first of three regional monthly meetings was held on March 3, 1971, in De Funiak Springs. Part of each of these meeting days was devoted to "information giving" relative to drug abuse, and part to developing ideas, exploring attitudes and outlining curricula plans. Between these monthly meetings each county team held individual meetings and invited all other teachers in their county to make a contribution to the program. The result was that every teacher in the six counties had an opportunity to guide the development of Operation Prevention. In addition, each of the six counties began developing a written curricula focusing on drug abuse education.

These activities culminated in a week long Operation Prevention Summer Workshop held at the University of West Florida, June 14th-18th. This workshop differed from the typical drug abuse education training programs in several important respects.

The program included a considerable amount of direct information exchange. Various experts, including other educators, researchers, law enforcement officials and psychologists presented their perspective on drugs and drug abuse. An ample opportunity to discuss issues informally with these people was also built into the program.

In addition to providing teachers with the most up-to-date information on drugs and drug abuse, this program attempted to equip teachers to lead discussions with students on drugs; understand the dynamics of small groups (the type of setting which is often useful for this kind of discussion); and most importantly, to understand and communicate with students on this vital issue.

As a means of accomplishing this, the program included a substantial amount of time to small group training on the processes and dynamics of such groups. An important feature of this small group training was the inclusion of a number of young people, both high school students from the six participating counties and college students, who were familiar with the drug situation today, into these training sessions. During the discussion with these young people, teachers came to an understanding of some of the motivating forces acting on young people today, and learned a great deal about their own feelings and attitudes regarding drugs, drug abuse, and even the young people themselves. In addition, the program also included specific opportunities and a significant amount of time to work on curriculum development. Time was devoted to this urgent endeavor each day in achieving the goal of having a workable curricula for the different grade levels by the end of the training program.

A NOTE TO THE TEACHER:

We live in a drug oriented society, where children are saturated with

the wonders of drugs from the time they are first able to see television commercials on aspirin and Geritol. Children accept drugs as a necessary part of society. The problem arises when they have to differentiate between the legal and the illegal. How are we to explain the difference between the drugs doctors prescribe for them and the drugs accepted by their parents and the drugs they learn about in school? The teacher's role is one of prevention, familiarizing pupils, making them aware, and building a base in human values. We cannot and must not use fear tactics. Research indicates that police tactics and negative attitudes are not effective. Children's attitudes are not changed by these methods. Neither must we dwell on hard narcotics, but especially at the elementary school level, we must approach drug abuse problems from a positive viewpoint. The secret is THE HOW, THE WHY, AND WITH WHAT ATTITUDES do you present drug abuse education.

The key is one of building proper attitudes, teaching decision making, working from the concept and appreciation of the human body. Basic to developing attitudes and appreciation is how do you solve your problems, what do I have with which to meet life?

Citizenship needs to be stressed. Another teacher responsibility is to point out the relationship between drugs and being a good citizen. The basic concept of the laws being challenged is another aspect on which we must work. As citizens we need to learn respect for the law.

The problem with our school age children is not so much of marijuana, heroin, and hard narcotics, but one of teaching values, and one of producing mentally healthy and socially adjusted children.

We are already teaching the effects of alcohol and tobacco as required by state law. In teaching about drug abuse, as in all curriculum areas, we must avoid lecturing and moralizing. The underlying concept of the program is one of responsibility, responsibility to ourselves and to others. We must stress reason and awareness as opposed to punishment, fear, and morality. Positive and negative aspects must be stressed but not dwelled upon. These concepts are not only about drugs, but about people. We want to produce behavioralistic change. Guidance in the child's emotional and social development is most important. The strongest deterrent to drug abuse in a child's future lies in his strength of character and in his ability and determination to face life and enjoy it through the wholesome understanding and constructive use of his own resources.

The following pages contain some ideas developed by teachers in your — county as an initial step in devising a drug abuse education curriculum program in grades K-12. These curricula ideas are only resources and a starting point to generate creative approaches for Operation Prevention. As in the case of any such curricular innovation, an on-going program of evaluation must be instituted which will result in a continuance of curricular improvement and clearly demonstrate the benefits of the program. It is hoped that this year each of you will share with those of use in the other counties the results of your teaching in drug abuse; thereby strengthening our curricular program in each succeeding year.

The development of a curricular program to create attitudes, under- — standings, and appreciations which result in abhorrence of drugs and an abstinence from the use of drugs will place the six counties in the Florida Panhandle in a position of statewide prominence and leadership in drug abuse education.

COMMITTEES:
PUBLIC SCHOOLS, CHAIRMAN
RULES, CALENDAR, PRIVILEGED
BUSINESS AND ETHICS
WAYS AND MEANS

In 1970, after meeting with several professors of the University of West Florida, and after conversations with several education leaders, it became obvious that the State Legislature must provide the necessary vehicle for a drug education program to be developed. Senate Bill No. 634 was subsequently developed to provide legislation to accomplish this end. Senate Bill 634, which was passed during the 1970 session, provided a structure for a comprehensive approach to this matter of vital concern to us all. The requirement of the law is that all children in public school be enrolled in classes that teach them the dangers of drug abuse.

The University of West Florida, under the leadership of Dr. Bob Thornton and Dr. Billy Williams and the school boards and school superintendents of six of the most westerly counties in Florida, have been involved in formulating a program which will be the model for the entire State.

The citizens of the State of Florida owe this group a debt of gratitude for undertaking and completing this vital task. We must now undertake an additional task of disseminating this very fine work to the teachers of our State education system. I feel positive that after having made this excellent beginning the program will be a tremendous success and we will be providing a valuable service to the young people in our State.

Dr. Billy Williams
Vice President for Education
University of West Florida
Pensacola, Florida 32504

Dear Dr. Williams:

It gives me great pleasure to know that a cooperative effort in the vital area of drug abuse education has been demonstrated in "Operation Prevention." The University of West Florida and the participating counties of Bay, Holmes, Okaloosa, Santa Rosa, Walton and Washington will profit in many ways from this endeavor. Frequently, it is not immediately realized.

I was also pleased to know that during the training sessions and curriculum development that students were part of the involvement. It has been my sincere feeling that in the area of drug education that we pull together all available resources and share the expertise that is available for the benefit of all people in Florida.

Please continue your fine work and feel free to share your experiences with me.

Sincerely,

Floyd T. Christian

PHILOSOPHY FOR DRUG PREVENTION IN EARLY CHILDHOOD YEARS

Whenever faced with serious societal problems, education automatically assumes responsibility for attempting to find the solution. Recently, the Florida Legislature passed a Drug Abuse Education Act making such education mandatory in the public schools (K-12) beginning in the 1971-72 school year.

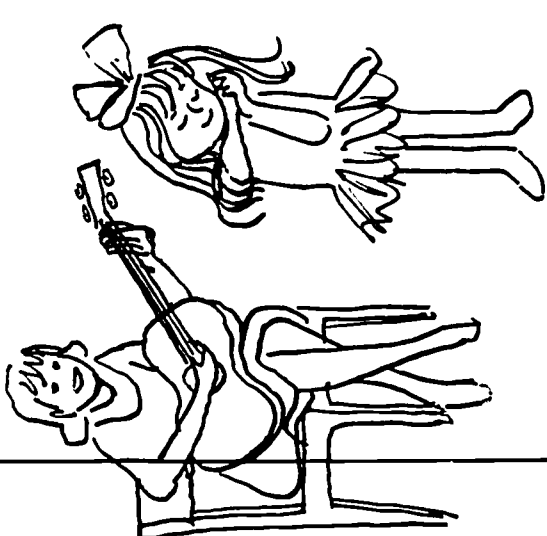

The straight lecture and textbook methods of instruction have proved unsuccessful. Research indicates that preaching, moralizing, misinforming, using fear tactics and exaggerating in dealing with respect for drugs do not work. The method of teaching drug respect will be a positive child-oriented approach. Communication between young people and adults should be encouraged.

The development of individual attitudes will be of utmost importance. Drug respect will be taught as a complete academic subject in a specific block of time throughout the school year. Furthermore, as various situations arise, the teacher and students will recognize the problem at hand and discuss possible solutions. This approach, though time consuming, is necessary in order to develop awareness of personalities and behaviors.

The basis for this K-3 curriculum is a total approach to health incorporating the inter-relatedness of emotional, intellectual, social and physical well-being. At this formative level of childhood, attitudes must be developed to serve as a foundation for understanding, respecting and appreciating the role of drugs in healthy living. Parent involvement, orientation and education must be an integral part of this program.

The K-3 program is based on three broad concepts: personal responsibility for developing a healthy mind; drugs and poisons in the child's environment and personal responsibility for developing a healthy body.

Drugs in the Community	<p>The children will be cautioned not to take anything from a stranger.</p> <p>Teacher and students will discuss community safety rules in such places as parks, beaches, deserted buildings, etc.</p>	

HOME SAFETY CHECK LIST (for distribution to parents)

Dear _____:
(name of teacher)

I took this check list home and helped my family check all of the places where potentially poisonous products might be found. We talked about safer places and ways on which to keep things which might be poisonous. I promised always to ask before tasting anything I found around the house. I'm going to try to protect other children who live in my home or come to visit us, too, so they will be safe from poisoning.

Here are the places my family looked to see if potentially poisonous products were stored safely, out of reach of little children:

Bathroom _____	Dining Area _____	Workshop _____
Bedrooms _____	Basement _____	Utility Room _____
Kitchen _____	Garage _____	Special Storage Places _____
Livingroom _____	Attic _____	Porch & Under the Porch _____
Closets _____	Yard _____	Other _____

My family looked especially for these things:

Kerosene and Gasoline _____	Disinfectants and Deodorants _____
Aspirin and Sleeping Pills _____	Fertilizers and Weed Killers _____
Dye and Bleaches _____	Toilet Bowl and Drain Cleaners _____
Soaps and Detergents _____	Moth Balls and Pesticides _____
Polishes and Cleaning Powders _____	Paint Remover and Turpentine _____
Ant and Rat Poison _____	All Kinds of Sprays _____

Now we hope that our home is poison-proof!

Sincerely yours,

(name of child)

Plan for Safety Scrapbook

Billy's Safety Book.

This is Billy.

When I want something to eat,
I ask.

Mother.

Some things are safe
to eat or drink.

Some things are not safe
to eat or drink.

So I ask first.

Lock up unsafe things.

Help keep baby safe.

Safe? Not Safe?

Safe to taste? Not safe to taste?
Put an X in each box beside a "safe to-taste" product.

EVALUATION:

The evaluation of the students cannot be objective in the area of attitudinal change. Teacher observation and evaluation will be continuous. Changes in student behavior should be noted. Example (in the form of a check list): Restrains from putting foreign or unknown objects into the mouth. Student shows evidence of sound judgment. Student exercises self-protection. Positive changes in the sociogram. Given a choice the student shows evidence of decision making. Student will show awareness of feelings. Expressing positive attitudes concerning a visit to the dentist or doctor. Expresses awareness of proper health habits. Demonstrates good hygiene. Has developed independence and interdependence in the carrying out of activities. Shows positive changes in the attitude surveys. Expression of ideas in role-playing. Expression of ideas in art. Evidence of physical skills. Evidence of knowledge and comprehension in the area of drug respect. The above will be evaluated by the terms Satisfactory, Needs to Improve or Unsatisfactory. Teacher code: S U N.

BROAD OBJECTIVE: Personal Responsibility for Developing a Healthy Mind
 GRADE 2

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
Individual Development	<p>Personal responsibility for developing a healthy mind and positive self-concept is a continuous process. Synthetic student activities are of little value. Films and stories may lead to expressing of feelings, thoughts and attitudes about a specific behavior. The teacher must be aware of these spontaneous situations and capture the mood.</p> <p>The following are various aspects of developing a healthy mind and positive self-concept:</p> <p>Acceptance of making mistakes (teacher included). Coping with feelings of impatience or anger within self. Developing creativity through self-expression (art, music, movement, communication). Doing one's best. Enjoying the world around us and preserving ecology. Growing up through new experiences and communicating them. Handling shy or scared feelings. Listening (teacher, too). Encouraging self-reliance. Putting things where they belong in a neat manner. Seeing things from another's point of view.</p> <p>(Con't)</p>	<p>Tim Listens and Learns, Deincke</p> <p>Big Little Davy, Lenski</p> <p>When I Grow Up, Bethell</p> <p>When I am Big, Smith</p> <p>What Do I Say, Simon</p> <p>Record 45RPM I'd Rather Be My Size</p> <p>All In One Day, Ozone</p> <p>Almost Big Enough, Tamburne</p> <p>When I Grow Up, Lenski</p> <p>I Want To Be Different, Woods</p>

BROAD OBJECTIVE: Personal Responsibility for Developing a Healthy Mind
 GRADE 2

	<p>Taking care of personal belongings. Awareness of individual differences. Awareness of the roles of adult helpers at school.</p> <p>Awareness of causes of agreement and disagreement such as lack of sleep, hunger, boredom vs relaxation, excitement, etc.</p> <p>Teacher-student discussion concerning the effects of good and bad habits. The students will role play "breaking a bad habit."</p> <p>Teacher-student discussion concerning the difficulty of breaking habits. Making distinction between real and make believe. Respecting for all property. Helping children like others. Encouraging-confidence in himself and his abilities. Encouraging-confidence in others. Encouraging-self worth. Encouraging-self-respect. Encouraging-responsibility. Awareness of personal achievement and progress. Participating as a leader and a follower. Assuming responsibility for his own actions. Exhibiting sense of fair play. Responding to directions and accepting the limits involved in living in a democracy.</p> <p>(Con't)</p>	<p>What Do I Do?, Simon</p> <p>Filmstrip Getting To Know Me, SVE</p>

BROAD OBJECTIVE: Personal Responsibility for Developing a Healthy Mind
GRADE 2

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
Social Development	<p>Consideration for others. Coping with feelings of impatience or anger in relationship to the group. Growing up through new experiences and communicating them. Being a good loser and winner. Helping others, showing compassion. Working well with others. Awareness of ways to settle disputes-- (compromise, share, take turns, etc.) Talking out feelings with parent, teacher or other trusted adult. Exhibiting good citizenship. Respecting all property. Building positive relationships within his family, peers and adults outside of the home. Respecting rights of others. Cooperating with others. Respecting those in authority. Participating as a leaders and a follower. Giving and accepting helpful criticism. Some suggested student activities venting emotions (taking into consideration respect for others): clay, pounding bench, finger paint, water, sand, art projects, punching bag, physical exercise, role playing pantomimes, time-out room, etc. The students will refuse to accept unwise dares or consent to unwise experimentation.</p>	<p>Sesame Street Book of People and Things, Teltser Manners, Parish Record 45RPM Berties Little Brother What Do You Say, Dear?, Joslin Who Do I Say, Simon The True Book of Freedom and Our United States How Families Live Together, Provies That New Baby, Suba At Home, Sheldon Filmstrip Family Members Work, SVE Filmstrip Living With Your Family, SVE Family, Witty Where Are You Going Today, Koester Filmstrip The Happy Family, Eye Gate Filmstrip Families Have Fun, SVE (Con't)</p>

Give three reasons <u>why not</u>.</p> <p>Play only in clean areas.</p> <p>Leave public beaches and parks clean for others to enjoy.</p> <p>Dispose of trash in the proper way.</p> <p>Tape own story on poison prevention in the community.</p> <p>If you must smell a container, smell it in the proper manner.</p> <p>Do not drink polluted water.</p> <p>Stay away from trash and garbage receptacles.</p> <p>Do not touch a drinking fountain with your mouth.</p> <p>Take precautions when using public bathrooms.</p> <p>Make a community helper your friend.</p> <p>Children will scan the newspapers for stories of accidental poisonings, etc.</p>	

BROAD OBJECTIVE: Drugs and Poisons in the Child's Environment
 GRADE 3

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
Community Environment	Children will make up jingles & rhymes or slogans to dramatize poison prevention.	

PHILOSOPHY FOR DRUG PREVENTION IN THE MIDDLE ELEMENTARY YEARS

The upper elementary grades are a critical period in a drug prevention program because the child is beginning to enter a new phase in his development. The desire for peer group acceptance creates an awareness of a new and powerful influence in his life. Through drug education, the child may begin a phase of his life equipped with honest facts concerning drugs.

Many adults in our society abuse drugs by taking medications for every minor discomfort. Children see this and also notice their parents' consumption of alcohol and tobacco. Children are convinced that their selection is a better one. Useful drugs become dangerous with abuse. This is especially true of drugs that produce dependence. The fact that scientific research has not established all the negative and positive aspects of drugs they consider mind-expanding and soul-purifying does not seem to worry young people and does not deter them from their quest for a short cut to happiness. Punitive measures have not been successful; therefore, education must be the answer. Teachers are in a particularly good position to encourage parents, students, and the community to remain level-headed about the drug abuse.

It is necessary at the fourth, fifth and sixth grade levels of drug abuse education for the students to be taught an awareness of the physiological, social, and emotional effects of drugs on the human body. As a prerequisite to this study of drugs, an understanding of the normal functions of the human body should be taught. At the fourth grade level the physical, social, and emotional needs and ways to help students supply these needs must be stressed. At the fifth grade level, physiology of the human body is studied. Here the physiological effects of drugs should be stressed. At the sixth grade level, the drug prevention program should be approached from the behavior patterns

of the preadolescent child. Drug abuse is as a symptom of the lack of ability to adjust to the emotional changes taking place in the body. Hopefully, these students can be shown constructive ways to cope with their daily problems without the use of chemical agents.

BROAD OBJECTIVE: Behavior Patterns Influence our Present and Future Health.

BROAD OBJECTIVE: Man Has Attempted to Deal With the Dependency-Producing Drugs by Restrictive Legislation and
 GRADE 5 Prevention and Rehabilitation Centers.

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
	<p>Have resource people from Mental Health Clinic talk to class about Treatment Centers.</p> <p>Have local narcotics officers talk to class about what is being done in your community about drug abuse.</p> <p>Show the film "Flowers of Darkness"- about treatment centers.</p>	

SUGGESTIONS FOR EVALUATION IN 5th GRADE

Objective Type tests on Drugs and their physiological effects on the body.

Evaluation of vocabulary. Be sure children understand words being used.

Teacher observation.

Children do self-evaluation and also have two children do cross evaluations.

Have children evaluate research and report on findings. No grade needs to be given.

Evaluation through production of charts, posters, bulletin boards, scrap-books, etc.

Have children write film reviews after showing.

Classification of lists into food and non-food substances.

Observation of student participation in activities.

BROAD OBJECTIVE: One Must Understand Himself, His Attitudes, Feelings and Capabilities in Order for Him to be Able to Adjust to and Feel Secure in his Daily Relationship with Others.

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
<p>Individual Behavior Patterns</p> <p>Self-discipline</p> <p>Sense of responsibility</p> <p>Independent thinking</p> <p>Maturity</p> <p>Self-esteem or self-worth</p> <p>Respect for others</p> <p>Emotional and Mental Health</p> <p>Ability to cope with daily problems</p> <p>Appropriate expression and acceptance of feelings.</p> <p>Seeking educational opportunities</p> <p>Desire for self-fulfillment</p> <p>Social Development</p> <p>Self-acceptance and acceptance of others.</p> <p>Peer group acceptance</p> <p>Development of good attitudes and values.</p>	<p>Buzz Groups (discussion groups of students). Use open-end sentences or situations as starters for discussion.</p> <p>List and discuss individual needs and acceptable ways to satisfy these needs</p> <p>List characteristics of people who are able to get along well with others and discuss these.</p> <p>Have each student pick out his worst fault and tell how he hopes to overcome it.</p> <p>Set up question box and encourage questions dealing with worries and fears of class members. Use for discussion.</p> <p>Discuss good sportsmanship and fair play.</p> <p>Encourage dependability and responsibility through individual and cooperative tasks.</p> <p>Discuss need for success that everyone has and ways to meet these needs</p> <p>List responsibilities for sixth graders and ways of accepting these.</p>	

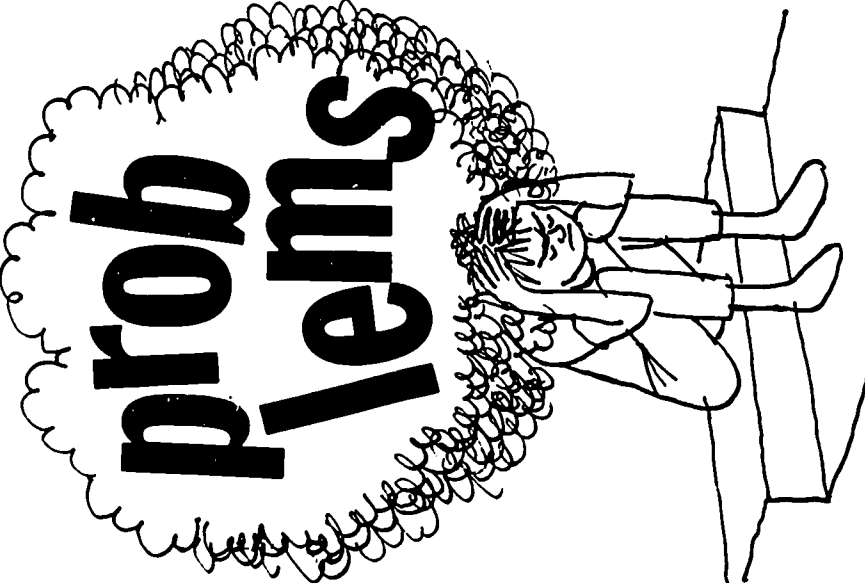

BROAD OBJECTIVE: One Must Understand Himself, His Attitudes, Feelings and Capabilities in Order for Him to be Able to Adjust to and Feel Secure in His Daily Relationships with Others.

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
Many people abuse drugs because they do not know how to cope with daily problems constructively.	Discuss emotional needs and changes experienced in pre-teen and early teen years.	
	Encourage students to write essays on "The Fine Art of Saying 'No'". Discuss these.	
	Discuss and list some of the steps relative to the experiences of your students which are necessary for emotional maturity.	
	Discuss examples of mature and immature behavior.	
	Discuss student-oriented goals that are within the realm of student achievement.	
	Discuss student ideas of types of experimentation to obtain peer group acceptance.	
	Role-play the situation of a student's first introduction to try drugs by a friend. Discuss how some people may be led to experiment with drugs.	
	Compile a list of those factors students think are responsible for effective group membership and analyze them critically, emphasizing self-discipline & independent thinking	

BROAD OBJECTIVE: One Must Understand Himself, His Attitudes, Feelings and Capabilities in Order for Him to be Able to Adjust to and Feel Secure in His Daily Relationships with Others.

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
	<p>Discuss how feelings of self-worth, a sense of responsibility and friendliness are necessary to our social development.</p> <p>Develop standards of conduct which show respect for the ideas of others.</p> <p>Role play how to cope with pressure from friends who insist that others use drugs.</p> <p>Describe and discuss constructive ways that are safe to show independence, eg. doing homework promptly, helping friends solve problems, helping family members, etc.</p> <p>Have children write a paper on how their friends influence their choice of activities.</p> <p>List and evaluate methods of coping with daily problems.</p> <p>Let children list decisions that they have made during the past 24 hours. Discuss common situations involving children their age that require decisions.</p> <p>Let children compile a list of criteria for good decision making.</p>	

BROAD OBJECTIVE: One Must Understand Himself, His Attitudes, Feelings and Capabilities in Order for Him to be Able to Adjust to and Feel Secure in His Daily Relationships with Others.

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
	<p>Role play involving situation requiring value judgment and decision making.</p> <p>Make tapes and displays of drug advertisements. Discuss the various slogans and why they might appeal to people.</p> <p>Discuss how a person might come to depend on drugs rather than on himself as a solution to daily problems.</p> <p>Discuss why and how daily problems left unsolved can become monumental in the thinking of a person. Role play to illustrate.</p>	

BROAD OBJECTIVE: Drugs and Volatile Chemicals, When Improperly Used, are Potentially Dangerous.
 GRADE 6

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
Dangerous Drugs Hallucinogens LSD DMT mescaline marijuana psilocybin Opiates morphine heroin codeine paregoric Barbiturates (sleeping pills - depressants) Amytal Nembutal Phenobarbital Alcohol Amphetamines (diet or pep pills - stimulants) Benzedrine Dexedrine Methedrine Nicotine	<p>Read, research and report on pamphlets on different drugs.</p> <p>Discussion groups on individual drugs and their effect on body.</p> <p>Film strips on different drugs.</p> <p>Discussion of filmstrips.</p> <p>Discussion of personality traits of people using drugs and constructive ways to use energies of these people.</p> <p>Show sets of slides on drugs.</p> <p>Use school nurse to lead discussion and answer student questions.</p> <p>Through discussion, choose a workable definition of words to be used in the unit. - (drug, emotional, dependence, etc.)</p> <p>Collect information on medical research, kinds of drugs, medicines uses and misuses.</p>	

SUGGESTIONS FOR EVALUATION OF THE 6th GRADE

Check List

	Yes	No
1. Do I possess characteristics that make me easy to get along with?	_____	_____
2. Am I progressing in overcoming my worst fault?	_____	_____
3. Do I display good sportsmanship and fair play at all times?	_____	_____
4. When I have a task to do, do I complete the task on time?	_____	_____
5. Do I accept responsibility when it is given to me?	_____	_____
6. Do I let my friends persuade me to do things I don't want to do?	_____	_____
7. Do I have immediate goals I'm working to obtain?	_____	_____
8. Do I have longtime goals that I'm working toward?	_____	_____
9. Am I achieving in relation to my ability?	_____	_____
10. Do I have constructive interests to help fulfill my needs?	_____	_____
11. Do I contribute my share in group work and discussions?	_____	_____
12. Can I examine evidence and make a decision?	_____	_____
13. Can I read an advertisement and analyze and evaluate it?	_____	_____
14. Can I cope with my daily problems without becoming frustrated?	_____	_____
15. Do I feel that I am growing into a worthwhile person?	_____	_____

Teacher Observation

Paper for Evaluation of Self in Accomplishing goals set up.

Evaluate program with constructive criticism and suggestions. This can be oral and written.

Objective Type Evaluation.

Define:

Use
Misuse
Abuse
Hallucinogen
Opiate
Depressants
Stimulants
Barbiturate
Amphetamine

Classify each of these drugs into the group (a) Hallucinogen (b) Opiate
(c) Barbiturate (d) Amphetamine.

Give at least one danger of misuse of each of the following:

- | | |
|------------------|-----------------|
| (a) Hallucinogen | (c) Barbiturate |
| (b) Opiate | (d) Amphetamine |

Pre test and Post test on Transparencies

"Drugs and You" See Resources

6th GRADE TEST

1. What are hallucinogens?
2. Name two hallucinogens?
3. How do hallucinogens effect the body?
4. What are two immediate dangers from the use of hallucinogens?
5. Name one medical use of hallucinogens?
6. What do amphetamines do to the body?
7. What is the danger of amphetamine abuse?
8. Name two medical uses of amphetamines.
9. What do barbiturates do to the body?
10. Why is overdosing so prevalent when barbiturates are prescribed by doctors?
11. Name two medical uses of barbiturates?
12. What are narcotics?
13. How do most addicts get started using heroin?
14. What is the danger of inhaling volatile chemicals?
15. Name ten reasons why young people use drugs.
16. How does alcohol effect the body?
17. What is a lethal dose of alcohol?
18. Write at least a half page on how you can avoid becoming a drug abuser.

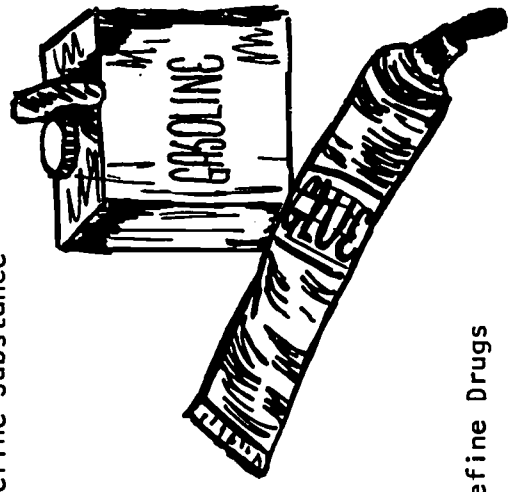

PHILOSOPHY FOR DRUG PREVENTION IN THE TRANSITIONAL YEARS: GRADE 7

Since there is evidence of need for education in the proper use of drugs, Florida Legislature has instructed the State Department of Education to implement a drug education program.

We believe the home, church, school, civic organization, and agencies must each accept the responsibility for solving this problem through the education of students, parents, and other concerned adults.

As educators, we further believe that students should be given an opportunity to assess and to originate alternative solutions to personal problems for improving the self-concept and facing reality. Opportunities for students to become knowledgeable in the proper use of drugs socially and biologically must be an essential part of the drug education program.

BROAD OBJECTIVE: Many Widely Used Substances Contain Drugs
 GRADE 7

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
<p>Define Substance</p>  <p>Define Drugs</p>	<p>Discuss as many definitions of "substance" as can be found (technical commonly used, chemical, etc.)</p> <p>Form an oral consensus of opinion on definition of "substance"</p> <p>Discuss substances used in the classroom and school environment which fit the definition of "substance"</p> <p>List "substances" previously discussed which all (or most) people use.</p> <p>Discuss definition of drugs using resource pamphlets, books, texts, dictionary, etc.</p> <p>Write the definition of "drugs" based on consensus of opinion after the above research.</p> <p>Display items used in the classroom and school environment which contain drugs.</p> <p>Label the above display items as "safe" or "unsafe" for unrestricted use or consumption.</p>	<p>Dictionary, science text, encyclopedia, pamphlets.</p> <p>Science teacher, home economics teacher.</p> <p>Curriculum coordinator, custodian, secretary, food service personnel.</p> <p>Consumer's guide magazine, daily newspaper, periodicals, TV Commercials, radio, billboards.</p> <p>Dictionary, science text, encyclopedia, pamphlets.</p> <p>Resources on "Group Dynamics", "what is consensus?".</p> <p>3-D display area, items borrowed from school environment.</p> <p>Classification list of drugs and their effects on the body.</p>

BROAD OBJECTIVE: Drugs Are Found in the Home
 GRADE 7

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
Know what drugs are found in the home.	<p>Collect labels from empty drug packaging and <u>display</u> on bulletin board.</p> <p>Collect advertisements from periodicals of drugs and <u>arrange</u> in collage.</p> <p>Prepare exhibit of various types of medicine commonly found in the home.</p>	<p>Empty drug packaging, 2-D display space, misc. lettering and layout supplies (glue, scissors, etc.)</p> <p>Periodicals, collage backing, scissors, glue shellac.</p>
Know where drugs are kept in my home, relatives' home, friends' home.	<p>Draw schematic of my home and <u>locate</u> drug storage.</p> <p>Discuss and compare location of drugs in my home and that of others in class, relatives, friends.</p> <p>Plan a schematic which would be useable for storing drugs in the average home.</p> <p>Develop a letter to parents suggesting safe ways both to store and to dispose of medicine.</p> <p>Ask pharmacist to describe various forms of medicine and their uses.</p> <p>Discuss uses of drugs commonly found in the home.</p>	<p>3-D display space, medicines found in home, drapery, small risers.</p> <p>Drawing paper, pencils, rulers, chart of symbols for doors, windows, etc.</p> <p>Schematic previously made of my home. 2-D display to compare schematics.</p> <p>Books of house plans (floor lay-out), graph paper, ruler, pencils.</p> <p>Paper, pencil-pen, include schematic prepared above applicable to average house.</p> <p>Pharmacist</p> <p>Collages previously made, 3-D display previously made, bulletin board display previously made.</p>

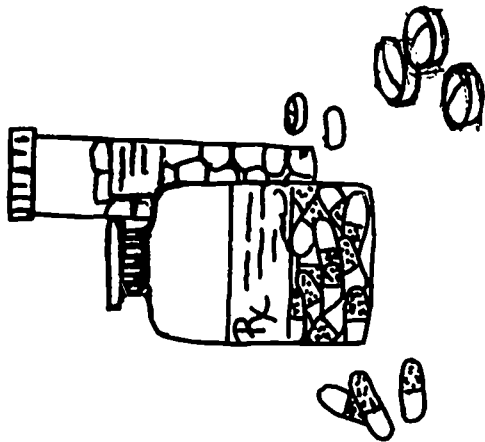

BROAD OBJECTIVE: Drugs Are Found in the Home
 GRADE 7

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
Know why drugs are found in the home.	<p>Divide display of drugs commonly found in the home into tablets, capsules, ointments, sprays, creams, liquids, mists, etc.</p> <p>Arrange display of drugs commonly found in home into categories by use: household cleaner, body cleaner, antiseptic, insecticides, herbicides, germicides, etc.</p>	<p>3-D display area, drugs commonly found in home.</p> <p>3-D display area, drugs commonly found in home.</p>
Know for whom drugs are in the home.	List members of household, their age, occupation, physical dependency on drugs, (constant or occasional), and length of time they use various drugs.	Members of household, paper, pen.
Know how drugs come into the home.	<p>List household shoppers.</p> <p>List businesses from whom purchased.</p> <p>List prices paid for drugs and note differences from various stores.</p> <p>Role-play purchase of drugs from time decision is made to storing in the home, giving possible errors which might occur.</p>	<p>Members of household, paper, pen.</p> <p>Members of household, labels from drug packages, monthly statements from charge accounts, paper, pen.</p> <p>Member of household who handles payment of accounts, price tag from drug packages, newspaper, periodicals TV ads.</p> <p>Members of class.</p>

BROAD OBJECTIVE: Drugs Are Found in the Home
 GRADE 7

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
Know when drugs can be used safely.	<p>Research current Red Cross First Aid handbook for suggested treatment of accidents which might occur within the home or school environment.</p> <p>List the drugs recommended by the above research.</p> <p>Compare list of drugs in my home with list recommended by Red Cross first aid.</p> <p>Practice (role-play) use of the above drugs on simulated accidents. Speculate on possible errors and results.</p> <p>Prepare chart to use at home on first aid treatment, home remedies available, and list their storage place. Share comments of family on the chart with the class.</p>	<p>Representative of local Red Cross unit, handbooks from Red Cross First Aid unit.</p> <p>Red Cross First Aid handbooks, paper, pen.</p> <p>List of drugs found in my home, list of drugs recommended by First Aid handbook.</p> <p>Members of class.</p> <p>Chart material (posterboard, felt tip pens, lettering guides, rulers, scissors, construction paper), list previously made of drugs found in my home, first aid Remedies suggested in First Aid handbook.</p>

BROAD OBJECTIVE: There Are Differences in Prescriptive and Non-Prescriptive Drugs and Each Serves a Purpose
 GRADE 7

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
<p>Know how there is a difference in prescriptive and non-prescriptive drugs.</p> 	<p>Invite local physician to discuss how he decides (chemically) the difference in prescriptive and non-prescriptive drugs.</p> <p>Invite local chemist to discuss how he sorts drugs in his laboratory as to prescriptive and non-prescriptive.</p> <p>Invite state enforcement officer of pure food and drug act to discuss importance of retailers distinguishing difference in prescriptive and non-prescriptive drugs.</p> <p>Survey advertisements in periodicals, newspapers, etc. for determining if drugs are advertised as "prescriptive" and "non-prescriptive".</p> <p>Research state and federal laws which require distinguishing between prescriptive and non-prescriptive drugs by handlers.</p>	<p>Local physician, informal classroom environment for effective discussion.</p> <p>Local chemist, informal classroom environment for effective discussion.</p> <p>State Pure Food and Drug officer, large group (150-200 students), A-V equipment for visual presentation.</p> <p>Local and area newspapers, periodicals TV commercials verbally described.</p> <p>Textbooks, pamphlets, area legislator, local lawyer.</p>
<p>Know why there is a difference in prescriptive and non-prescriptive drugs.</p>	<p>Invite local physician to discuss the physical effects of drugs, both prescriptive and non-prescriptive.</p> <p>Invite a pharmacist or physician to discuss the factors that determine how a person may respond to drugs classified as prescriptive and non-prescriptive.</p>	<p>Local physician.</p> <p>Local pharmacist or physician. A-V equipment for visual presentation.</p>

BROAD OBJECTIVE: There are Differences in Prescriptive and Non-Prescriptive Drugs and Each Serves a Purpose
 GRADE 7

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
<p>Know why there is a difference in prescriptive and non-prescriptive drugs.</p> <p>Know how the prescriptive and non-prescriptive drugs have evolved in different cultures.</p>	<p>Group drugs brought from home into categories of prescriptive and non-prescriptive.</p> <p>Research history sources for the development of present Pure Food and Drug laws, in the U.S.</p> <p>Research history sources for development of prescriptive and non-prescriptive drug use in other cultures.</p> <p>Discuss probable reasons why all cultures deal differently with prescriptive and non-prescriptive drugs.</p> <p>Graphically illustrate the rise in use of prescriptive and non-prescriptive drugs in the U.S.</p> <p>Discuss reasons why the U.S. has encouraged or banned the advertisement of prescriptive and non-prescriptive drugs over the past 20 years (since TV has become common in the home).</p>	<p>Drugs brought from home.</p> <p>Textbooks, encyclopedias, pamphlets, filmstrips, films (check science sources, also).</p> <p>Textbooks, encyclopedias, medical journals, physician's textbooks, social studies sources.</p> <p>Classroom with informal atmosphere for effective discussion, artifacts of other cultures related to prescriptive and non-prescriptive drugs (borrow from local physicians, museum, art gallery, library, parents and local people who have traveled in other countries and collected art objects).</p> <p>Statistics on sales of prescriptive and non-prescriptive drugs, medical journals, consumer's reports, poster paper, ruler, pens, construction paper.</p> <p>Classroom with informal atmosphere for effective discussion, TV monitor to show examples of advertisements.</p>

BROAD OBJECTIVE: There are Differences in Prescriptive and Non-Prescriptive Drugs and Each Serves a Purpose
 GRADE 7

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
Know how individuals can distinguish the physical appearance of prescriptive and non-prescriptive drugs.	<p>Invite local physician to display variety of prescriptive and non-prescriptive drugs with opportunity for students to see, touch, smell, etc. the differences and similarities.</p> <p>Prepare bulletin board of textures (actual and simulated) with verbal descriptions of differences and similarities in prescriptive and non-prescriptive drugs.</p>	<p>Local physician, 3-D display area, classroom with informal setting for small group interaction.</p>
Know where prescriptive and non-prescriptive drugs are manufactured.	<p>Invite state pharmaceutical officer to discuss geographic locations of major manufacturers of prescriptive and non-prescriptive drugs.</p> <p>Locate on Florida map the location of manufacturers of prescriptive and non-prescriptive drugs.</p>	<p>2-D display area, papers, asst. found objects, glue, scissors, tacks, pens, paints.</p> <p>Local or area pharmaceutical officer, classroom for large group presentation (150-200) A-V equipment for visual presentation.</p> <p>Large map of Florida, or opaque projection, for approx. 30 viewers, pointer, and thumbtacks, pamphlets from Fla. Dept. of Health with information necessary.</p>

BROAD OBJECTIVE: Drugs Affect Different People in Different Ways: Physically, Mentally, Emotionally, Socially, Economically.
 GRADE 7

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
<p>Know how people differ physically, mentally, emotionally, socially, economically.</p>	<p>Define the terms "physical, mental, emotional, social, economic."</p> <p>Discuss the terms above and form consensus of opinion on an acceptable definition of each.</p> <p>Invite local authority on each aspect (physical, mental, emotional, social, economic) to discuss probably causes why people differ.</p> <p>Speculate as to what methods may be used to accept differences in people (physical, mental, emotional, social, economical.)</p>	<p>Pamphlets, dictionary, encyclopedias.</p> <p>Class members.</p> <p>Local physician, psychologist, minister, social welfare representative, Chamber of Commerce expert on industrial areas.</p> <p>Discuss with above consultants and classmates the possible ways man can reasonably accept people's differences.</p>
<p>Know how drugs affect the "normal" person.</p> 	<p>Research literature on effect of drugs on the human body which is "normal".</p> <p>View films, filmstrips, movies, TV programs, etc. showing varying degrees of affect on the "normal" person.</p> <p>Discuss the above audio-visuals and compare drug effects with those stated in the researched literature.</p> <p>Taperecord physician's patients describing how drugs (prescribed) affect them.</p>	<p>All available pamphlets, books, medical journals, periodicals.</p> <p>All available films, filmstrips, TV programs.</p> <p>Class members and written comments on effects researched in above activities.</p> <p>Physician, recording equipment, patient (giving approval for recording).</p>

BROAD OBJECTIVE: Drugs Affect Different People in Different Ways: Physically, Mentally, Emotionally, Socially, Economically.
GRADE 7

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
Know how drugs affect the "normal" person.	<p>Taperecord family members describing how drugs, prescribed and non-prescribed, affect them.</p> <p>Invite physician to describe the effects of drugs on people who are considered "normal".</p>	<p>Family members, tape recording equipment.</p> <p>Local physician, class members, informal atmosphere for effective discussion.</p>
Know how drugs alter the person who is not "normal".	<p>Visit a local institution for the physically or mentally handicapped to view visible effects of affect drugs have on the "abnormal" person.</p> <p>Invite a representative of the cerebral palsy clinic, mental health assoc., institution for the physically or mentally handicapped to discuss effects of drugs on the "abnormal" person.</p> <p>View films on mental and physical disabilities which illustrate effect of drugs on the "abnormal".</p> <p>Write a paper on "The disability I would least like to have", "How someone I know overcame Physical (or Mental) Disabilities through use of Drugs", "How someone I know was disabled through use of drugs", "Why some disabilities cannot be overcome through use of Drugs", "If I could invent a Drug, it would be one to _____", "The circumstances under which I would experiment with drugs".</p>	<p>Local institution which has been previously contacted for permission to visit.</p> <p>Local consultant from cerebral palsy clinic, mental health assoc., institution for the physically-mentally handicapped.</p> <p>Available films.</p> <p>Paper, Pen.</p>

BROAD OBJECTIVE: Drugs Affect Different People in Different Ways: Physically, Mentally, Emotionally, Socially, Economically.
 GRADE 7

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
Know how drugs alter the person who is not "normal".	<p>Compile a bibliography of books in our local city library which include information about drugs or in which drugs are an important part of the story (fictional and non-fictional)</p> <p>Collect commercial posters which show persons under the influence of drugs or who could be considered under the influence of drugs.</p> <p>Compose a verbal description of how a person would look under the influence of drugs, prescriptive and non-prescriptive.</p> <p>Compose a portrait of a person your age who is under the influence of drugs (non-prescriptive).</p>	<p>Paper, pen, appropriate information from books, etc., which have been read to constitute usable bibliography.</p> <p>Posters collected by students or other members of family.</p> <p>Information gained from previous activities, class members.</p>
Know which aspect of man (physical, mental, emotional, social, economical,) seems to be benefited by effective controlled use of drugs.	<p>Research benefits to man by the effectively controlled use of drugs (physical, mental, emotional, social, economical).</p> <p>Discuss finding of above research and form consensus of which aspect apparently could benefit most from effectively controlled use of drugs.</p> <p>Describe activities of people who are successful in spite of severe physical handicaps.</p>	<p>Art materials (paper, pen, brush, pencil, etc.) information gained from previous activities.</p> <p>All available pamphlets, books, etc.</p> <p>Above information, class members.</p> <p>Class members, informal environment conducive to effective communication.</p>

BROAD OBJECTIVE: Drugs Affect Different People in Different Ways: Physically, Mentally, Emotionally, Socially, Economically.
 GRADE 7

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
Know which aspect of man (physical, mental, emotional, social, economical,) seems to be benefited by effective controlled use of drugs.	<p>Invite local person who has successfully overcome physical handicap through effectively controlled use of drugs.</p> <p>Investigate research on use industry is making of mass dispensed drugs for production efficiency.</p> <p>Design chart showing which aspect of man (physical, mental, emotional, social, economical) seems to be currently most positively affected by effectively controlled drugs.</p>	<p>Local person, class members, informal environment conducive to effective communication.</p> <p>Industrial Journals, Psychological Journals.</p> <p>Chart material, information previously gathered in above activities.</p>
Know which aspect of man (physical, mental, emotional, social, economical) seems to need controlling by effective use of drugs.	<p>Have science teacher discuss physical aspects of man that could be controlled by drugs which would be socially acceptable.</p> <p>Have mental health association representative discuss emotional aspects of man that could be controlled by drugs which would be socially acceptable.</p> <p>Have social welfare representative discuss social aspects of man that could be controlled by drugs which would be socially acceptable.</p>	<p>Science teacher, local pharmacist.</p> <p>Representative of mental health association, A-V equipment for presentation to large group (150-200 students).</p> <p>Representative of Social Welfare organization, A-V equipment for presentation to large group (150-200 students).</p>

SUGGESTED EVALUATION

Ability to distinguish a "substance" is evident at completion of drug unit.

"Consensus of opinion" is used in other curriculum activities.

School is cooperative to the extent the students have freedom of investigating supplies used.

Increased awareness of effect of mass media on consumer decisions.

Verbalization is easy and unrestrained when defining drugs.

Re-use of "consensus" is reinforcing its merit in some group activities.

Items are freely loaned by administration, etc., indicating cooperation in drug education.

Display space is made available for school wide viewing.

Collection continues to grow after deadline for activity is past.

Skills learned in other area of curriculum are applied to drug unit. Art instructors involved in coordinating the required materials and art supplies.

Becomes involved in deciding what items should be purchased and why they are needed.

Becomes familiar with responsibility for expending monies for purchases, making monetary decisions.

Evaluates results of his purchases and attempts to improve over previous efforts to plan family expenditures.

Feels successful in decreasing household expenditures while maintaining previous quality and degree of maintenance, consumption, etc.

Can name the drug contained in the substances found at home when viewing label.

Is familiar with how many advertisements are contained in mass distributed periodicals.

Can distinguish medicine from other household substances.

Can express visually the areas of home which contain drugs, also relatives' & friends' homes.

Can generalize regarding how a family stores drugs and substances containing drugs.

Can generalize regarding how drugs can be safely stored in the average home.

Can verbally express to parents the need for safely storing and disposing of medicines.

Can verbalize with specialist in drugs and be able to transfer knowledge to family and others.

Can verbalize with class his personal family drug needs and habits with no embarrassment.

Can readily sort variety of substances containing drugs into categories of physical form.

Can readily sort variety of substances containing drugs into categories of use.

Can freely discuss with members of family their drug habits.

Can determine who in family is responsible for actual purchase of most drugs used.

Can name and locate geographically the retailer from whom drugs are purchased for the home.

Can classify drugs commonly used according to cost.

Can predict results of proper or improper purchase and storage of drugs.

Recognizes local Red Cross representative's role in community and is knowledgeable of personal responsibility in accidents.

Knows what drugs should be part of the home drug storage cabinet.

Can suggest to parent possible discrepancies in recommended list of home drugs with what is actually on hand in the home.

Can meet some common accidents with more knowledge of how to render first aid or find help.

Family used the chart to stock family drug storage and is more knowledgeable of first aid possible in the home.

Be generally knowledgeable with chemical differences in prescriptive and non-prescriptive drugs.

Be aware of how drugs are cared for in laboratories suggesting cautions needed by general public.

Be aware of federal regulations governing purity of food and drugs which protect our health.

Be aware that each person is held responsible for distinguishing the difference.

Be aware of label contents which are required by laws when shopping for substances containing drugs.

Be aware of the role a physician plays in deciding how to apply the benefits of prescriptive and non-prescriptive drugs.

Be aware of chemical effect of the prescriptive and non-prescriptive drugs on the body.

Be able to sort drugs found at home into prescriptive and non-prescriptive.

Know generally when major drugs were discovered, manufactured, etc., mass inoculation, epidemic consequences.

Be aware of development of use of prescriptive and non-prescriptive drugs in U.S. compared to other culture.

Be aware of probable reasons other cultures deal differently or similarly with drugs than U.S.

Be able to prepare a graphically visual statement which will communicate easily with others the desired information.

Be aware of the impact, both audio and visual, that TV has on the average household.

Be able to distinguish the differences in prescriptive and non-prescriptive drugs which are perceptible through the senses.

Be able to distinguish the physical characteristics accurately so as to visually and verbally express the distinctions.

Be able to locate major sources of manufacture or harvest of many commonly used prescriptive and non-prescriptive drugs throughout the world.

Can write a definition of the terms "physical, mental, emotional, social, economic."

Can for a consensus of opinion on a term which is controversial.

Can respect some local persons as "expertly" knowledgeable in the physical, mental, emotional, social, and economic aspects of life.

Can discuss ways which would indicate efforts to accept people who are different in these aspects of life: physical, mental, emotional, social, economic.

Is knowledgeable of sources of information on the human body, including recent publication.

Has opportunity to view quantity of films, filmstrips, TV programs giving different points of view.

Can accurately relay information in visuals to classmates and offer opinions.

PHILOSOPHY FOR DRUG PREVENTION IN THE TRANSITIONAL YEARS: GRADE 8

Drug abuse, like other forms of aberrant behavior, may have varying causes. For some, it may represent ill-advised experimentations; for others, it may indicate basic or adolescent psychological problems. Since reasons for drug abuse vary widely, so must the approaches to individual students. At the eighth grade level, the role of personality development in solving problems will be stressed. One such approach is to provide better ways to experience the richness of living and to make life more exciting and less dangerous than mind expansion by ingesting chemicals.

Realizing that frustration and deep discontent with contemporary living patterns are a widespread characteristic of our times and that contemporary cries depicting the drug problem as new is misleading, we believe it vital to change the main emphasis from DRUGS to the USER.

How often we see society violating the beliefs it preaches: brotherhood, equality and basic honesty with other people. It seems we live in a paradox . . . an oriented society where what one owns and appears to be rather than what one thinks and feels determines his identity. No wonder man at times seeks to escape responsibilities and tensions.

Negative and positive ways of coping with teen problems will be discussed in this unit, and hopefully, youngsters may find satisfaction in other activities and will be less likely to find regular use of drugs appealing. Main emphasis will lie in understanding self by evaluating strengths and weaknesses, setting personal goals and establishing a direction in life. Through their personal realization of worth, energies can be channeled into constructive outlets which will benefit the real world.

PHILOSOPHY FOR DRUG PREVENTION IN THE TRANSITIONAL YEARS: GRADE 9

"Turn on, tune in, and freak out" is a slogan of the psychedelic movement which has generated a style of art through posters, songs, and fabric design, creating a "now" generation and an alienation of young people as a separate segment of society. The history of our country has shown that young people's closest ties were with families and neighbors. This is not true today; young people's peers are a major influence. In addition to the visual and aural experimentations sought by the youth of society today is the social problem of drugs which is becoming an integral part of American consumption.

Because of advancements made in "miracle drugs" and the use of them in increasing the average life span and curing or alleviating previously incurable ills and diseases, people are more familiar with drugs. The mass media of television, magazines, and radio enhance the attraction of remedies for insomnia, trivial ailments, and mood-changers as solutions to problems and a quick, easy means to happiness. This trend toward everyday reliance on drugs has "reached down" to our youth, making them ignore the dangers of misusing chemical substances. Is it any wonder our young people feel a need to "fix themselves up?"

The basic key to solving any problem is to understand it. We do not understand the problem of drug abuse. In fact, we adults are barely conversant on the subject. The knowledge of drugs by youth is primarily limited to slang terms of users and pushers. If the size and scope of the present problem is evasive, the potentialities involved can only be guessed at due to the scarcity of empirical research data. The most respected authorities in medicine, law, and the social sciences are in wide disagreement on the most fundamental questions involved. Small wonder that youth is loath to accept the established social order and tends to rebel more generally and more violently than previous generations.

Through the drug education program it is hoped young people may learn to weigh the choices they have concerning drug use and the dangers involved, making them less vulnerable to the pressures imposed by the drug-oriented society. The moralistic and fear tactic approach should be avoided and an open, honest approach used, discussing values, reasons, and attitudes so relevant to youth today. Once the facts have been presented, it is hoped constructive attitude changes and an awareness concerning drugs will be the end product of the drug education program.

PHILOSOPHY FOR DRUG PREVENTION IN THE LATE ADOLESCENT YEARS

Most curriculum guides have dealt in depth with methods of Drug Abuse Education at the levels of Kindergarten through the ninth grade. Not much has been written for the young adults at the Senior High School Level, however. This probably stems from the educator's appreciation of the fact that by this age many children have been exposed to the drug education program of their peers in the streets and a feeling of frustration and helplessness overwhelms teachers knowing that often in the classroom an attempt to present a didactic course of instruction will be met with covert or overt hostility. It would be foolish of us to ignore the fact that many of our students have already made up their minds on the subject of Drug Use--either pro or con. It would be unrealistic, too, if we were not aware that some of our students are users.

To initiate a meaningful program at this level requires that we face these facts and yet we must remain aware that these same intelligent, well-educated young people hold the future of our country and our world in their hands. Education has solved many difficult problems before. Certainly this one is no harder than the Calculus or French. For a democracy to function properly its citizenry must be well educated. When confronted with a problem of this sort, no better means of solution can be found than to present the facts as completely as is at our disposal, to eliminate as much fable as is possible, and then to have faith that well-informed individuals will come up with knowledgeable decisions.

In many discussions with young people who are prisoners as a result of the drug scene, with ex-addicts, and with students at the junior and senior high level, the question has often been asked, "What can we as teachers do?" The universal response has been "get close to the student. Make him know you care." Too often when the student has become involved, he feels he can't discuss his problem at home with his parents or with any other adult. They

have conveyed the image of too many of us being concerned only with the subject area we teach rather than with the student as a whole human being. We as teachers can find many excuses for the situation having reached this stage and justify our position. Perhaps we must, however, accept the criticism and at least in this area of education be sure that the teacher who will be in the classroom for the purpose of Drug Education is the most vital cog in determining the success or failure of the program. The teacher must be the friend, the leader and the mentor. The teacher should be able to relax somewhat in the face of many confidences which will be shared with her when she has read the state regulations concerning her legal responsibilities and liabilities in this matter.

Many of the senior high school students who you will teach this year will be able to vote for the first time. All will in a year or so. The responsibilities and privileges associated with this right are closely related to the responsibilities of reaching a well-informed decision on drugs. As we are well aware, the abuse of drugs is one aspect of the many social problems that our country is confronted with at this time. It should be viewed in this overall context. The teacher and parent should also be aware of experimentation being a part of adolescence and try at all times to guide and direct this curiosity into healthy channels. The evolution of a strong sense of self-value and self-worth in moral, intellectual and physical areas will be the students' greatest defense against self-destructive activities. We should try at all times to encourage the growth of the particular talent the student possesses.

Emphasis on positive, optimistic approaches toward the problem under consideration with rewards for good rather than punishment for bad will help us solve this difficult problem.

This curriculum guide is the first step in our attempt to eliminate drug abuse from our community. We appreciate that it is a sparse outline and anticipate that feedback from all of you will enable us to enlarge it, broaden its vision and be more detailed at each grade level next year.

The young adults who have given invaluable assistance in the development of this curriculum ask that the factual portion of the medical, psychiatric and legal material be presented by experts in the field. New films only and information from scientific periodicals are requisites as well in order to preserve credibility.

At this age level student involvement, participation and community action should be the key methods for a successful program.

Since all students need to be exposed to the specifics on the individual drugs, their dangers, and the laws covering their use and abuse, it is strongly recommended that the detailed curriculum of the tenth grade be used at all levels in this first year.

Evaluation of this curriculum will best be evidenced by the degree of student interest and participation. A long-range evaluation would be accomplished by a statistical survey of use now as opposed to several years from now. It is recommended that each communication group keep a copy of their decision reached by consensus at the end of each activity. This could be submitted and filed by the teacher and examined by the group at the end of the course.

BROAD OBJECTIVE: Drugs Have Been Used By Man for Thousands of Years
 GRADE 10

CONTENT	SUGGESTED STUDENT ACTIVITIES	RESOURCES & MATERIALS
<p>Historical Development Drugs of Ancient Cultures (see accompanying chart) Dates of historical significance As far back as 2700 B.C. marijuana was known to the Chinese In 500 B.C. the Scythians were reported using marijuana Opium was known to the Egyptians as far back as 1500 B.C. Hippocrates "the father of medicine" recommended the use of the "juice of the white poppy", (opium) as a treatment for a number of sicknesses. Taken in combinations these drugs may lethal.</p>	<p>Fight or Flight, J and F Productions, Inc., Suite 700, 1401 Walnut Street, Phila, Pa. 19102</p> <p>Tacoma, Washington Curriculum Guide, pp. 5-6 (Senior High)</p>

Evaluation:

1. What is meant by the term drug abuse?
 What are some dangers of drug abuse?
 Define the terms

fix	hooked
cold turkey	speed

2. Classify the following drugs/substances

<u>Drug/substance</u>	<u>Classification</u>	<u>Effects</u>	<u>Duration</u>
Glue			
Marijuana			
Cocaine			
LSD			
Heroin			
Amphetamines			
Opium			
Barbiturates			
Alcohol			

3. List medical uses (if any) of the following drugs/substances.

<u>Drug/substance</u>	<u>Legitimate Medical Use</u>
Amphetamines	
Barbiturates	
Glue	
LSD	
Marijuana	
Heroin	
Cocaine	
Opium	
Alcohol	

4. Write the name of the substance which applies to the following statements.
 Select the substance name from the following: opium, barbiturates, marijuana, amphetamines, LSD, cocaine. More than one answer may apply.
- reduction of pain
 - loss of appetite
 - increased blood pressure
 - muscular trembling
 - produces visual hallucination
 - does not produce physical dependence
 - induces sleep and retards heart beat
 - does not develop tolerance
 - one trip may produce permanent personality change
 - produces tension and boisterousness

5. Match the class with substance

- | | |
|--------------------------|-------------------------------|
| A. Narcotic | _____ 1. opium |
| B. Stimulant | _____ 2. glue |
| C. Depressant (sedative) | _____ 3. marijuana |
| D. Hallucinogen | _____ 4. caffeine |

c) Unlawful Distribution to a minor	Imprisonment and/or fine twice that otherwise authorized		
d) Criminal Enterprise	10 years to life, maximum \$100,000 fine and forfeiture of profits	20 years to life, \$200,000 fine and forfeiture of profits	
V. MARIJUANA a) Possession	1 year and/or \$5,000 maximum fine	3 years and/or \$10,000 fine	Possessing or giving away marijuana is a misdemeanor instead of a felony, and minimum mandatory penalties for such offenses are abolished. However, the penalties remain heavy.
b) Unlawful Distribution	1 year and/or \$5,000 maximum fine	3 years and/or \$10,000 fine	
c) Unlawful Distribution to a minor	10 years and/or \$30,000 fine	15 years and/or \$45,000 fine	If under 21 and a first offense, he may be placed on probation in lieu of sentencing and the official record of his arrest, trial and conviction may be erased after satisfactory completion of probation.
d) Criminal Enterprise	10 years to life, maximum \$100,000 fine and forfeiture of profits	20 years to life, maximum \$200,000 fine and forfeiture of profits	

FLORIDA STATE LAW

Crime		
Possession	Amphetamines	\$1,000 fine or 2 years or both
	Barbituates	\$1,000 fine or 2 years or both
	Marijuana	First offense a misdemeanor, provided less than 5 grams of cannabis. Penalty - 1 year and/or \$1,000 fine in county jail.
	LSD	\$1,000 fine or 2 years or both
	Cocaine	\$5,000 fine or 5 years or both
	Heroin	\$5,000 fine or 5 years or both
	Volatile Substances	\$5,00 fine or 6 months or both
Selling	Amphetamines	Same as possession
	Barbituates	Same as possession
	Marijuana	If sold to someone under 21, \$10,000 fine and/or 5 years to life.
	LSD	Same as possession
	Cocaine	\$10,000 and/or 10 years; if sold to a minor \$10,000 and/or 5 years to life.
	Heroin	\$10,000 and/or 10 years; if sold to a minor \$10,000 and/or 5 years to life.
	Volatile Substances	Same as possession

CONCEPT III

Senior High School

Survey

1. "Drug and substance abuse may be defined as taking drugs or using substances under the following conditions:
 - a. in amounts sufficient to create a hazard to his own health or to the safety of the community; or
 - b. when he obtains drugs through illicit channels; or
 - c. when he takes drugs on his own initiative rather than on the basis of professional advice."*

*Report of the Task Force on Addictions, State of New York
Department of Mental Hygiene.

2. Answers will vary.

3. Definitions:

- fix - an injection of narcotics
- cold turkey - sudden drug withdrawal
- hooked - addicted
- speed - nickname for methamphetamine

Learning Activities

1. Classify the following drugs/substances by writing one of the following words in the second column: narcotic, stimulant, depressant, hallucinogen, solvent. Then cite physical effects of each and duration of the effect.

DRUG/ SUBSTANCE	CLASSIFICATION	EFFECTS*	DURATION*
Glue	solvent	intoxication	30 min. - 2 hrs.
Marijuana	hallucinogen	euphoria	4 hours
Cocaine	stimulant	euphoria	4 hours
LSD	hallucinogen	sense distortion, exhilaration	10 hours
Heroin	narcotic	euphoria drowsiness	4 hours
Amphetamines	stimulant	alertness activeness	4 hours
Opium	narcotic	euphoria	2-4 hours
Barbiturates	depressant	euphoria	4 hours
Alcohol	depressant	sense alteration	1-4 hours

*Effects and duration will be conditioned by dosage and method of administration.

2. List medical uses (if any) of the following drugs/substances:

DRUG/ SUBSTANCE	LEGITIMATE MEDICAL USE
Amphetamines	Relieve mild depression, appetite control
Barbiturates	Sedation, high blood pressure, epilepsy
Glue	None
LSD-25	Research only
Marijuana	Research only
Heroin	Pain relief
Cocaine	Local anesthesia
Opium	None**
Alcohol	Solvent, antiseptic

**Alcohol extracts of opium are used medically; the alkaloids are the pharmacologically active principles in opium; the two most important of these alkaloids are morphine and codeine.

Assessment

- A. 1. Reduction of pain - Opium
 2. Loss of appetite - Amphetamines
 3. Increased blood pressure - Amphetamines
 4. Muscular trembling - Barbiturates
 5. Produces visual hallucinations - LSD/ possibly marijuana
 6. Does not produce physical dependence - LSD/ marijuana
 7. Induces sleep and retards pulse beat - opium/ barbiturates
 8. Does not produce tolerance - LSD/ marijuana
 9. One trip may produce permanent personality changes - LSD
 10. Produces tension and boisterousness - amphetamines

B. Match

| A 14. | |

* Marijuana is pharmaceutically a hallucinogen/ legally it is classified as a narcotic.

It is reported:⁸

Marijuana does not produce physical dependence or an abstinence syndrome. Once the user has established the amount of marijuana needed to achieve his particular high, there is little tendency to increase the dose, indicating that tolerance doesn't develop. Moderate to strong psychic dependence can develop in accordance with the user's appreciation of the drug effects.

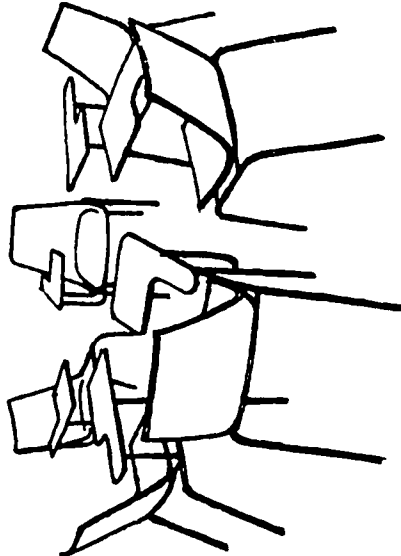

In terms of some effects on behaviors, use of marijuana is roughly comparable to moderate abuse of alcohol (also a drug). Like alcohol, it tends to loosen inhibitions and increase suggestibility, which explains why an individual under the influence of marijuana may engage in activities he would not ordinarily consider. Although the marijuana smoker sometimes feels himself capable of extraordinary physical and mental feats, he seldom acts to accomplish them for fear of disrupting his "euphoric" state. But what he does not realize is that the drug can have unpredictable effects--even on persons accustomed to its use.

To date, available information indicates that marijuana has few detrimental affects on an individual's physical health. Psychic dependence and the drug's effect, however, may lead to extreme lethargy, self neglect, and preoccupation with use of marijuana to a degree that precludes constructive activity.

Additionally, the use of marijuana may precipitate psychotic episodes or cause impulsive behavior in reaction to fear or panic. According to a 1965 report on drug dependence in the Bulletin of the World Health Organization: "Abuse of cannabis (marijuana) facilitates the association with social groups and subcultures involved with more dangerous drugs, such as opiates or barbiturates. Transition to the use of such drugs would be a consequence of this association rather than an inherent effect of cannabis. The harm to society derived from abuse of cannabis rests in the economic consequences of the impairment of the individual's social functions and his enhancement proneness to asocial and antisocial behavior.

SUGGESTED EVALUATION

This curriculum guide is offered as a basis for a community action program in which the knowledgeable, more mature student in our school systems can use his talents and energies to help eradicate the problem of Drug Abuse.

In the process of determining which area the class chooses to work in, an in-depth study of the factual material will become necessary and thus a review of the medical, legal, social, and economic problems associated with drug abuse will be covered. The techniques associated with the specific form of mass-media communications which the class chooses to use (television, radio, newspaper articles, a student curriculum guide, or adult-student round table discussions) will need to be learned and thus the students' horizons can be enlarged.

We have available to us as a nation a "think tank" in these classrooms whose resources and ingenuity are not being tapped. The students tell us again and again that they want action, involvement and participation. Perhaps this format will provide the setting needed to meet these needs.

The technical aspects of accomplishing a finished, polished product before the end of the course should be kept at the forefront of the teacher's thinking. Something they will take pride in will provide great satisfaction. Don't let the scope become so broad that it becomes a source of frustration. The teacher can facilitate accomplishment greatly by resourcing thoroughly the people and materials available in his area.

Evaluation should be dependent upon the interest and participation shown by the students, the quality of the finished project, and the impact it had as a force for good on the community as a whole.

GLOSSARY OF SLANG TERMS RELATED TO DRUG USAGE

by

Albert N. Meyerstein, M.D.

School Physician (Retired)

Farmingdale, New York

- A - LSD
 Ab - Abscess
 Acapulco Gold - High grade marijuana
 Acid - LSD
 Acid Head - A regular user of LSD
 Amped - Injectable methamphetamine
 Amphetamines - Bennies, Co-Pilots, Dexies, Dynamites, Eye-Openers, Hearts, Lid Proppers, Marathons, Peaches, Pep Pills, Roses, Truck Drivers, Wake-ups, Cartwheels, Footballs, Greenies, Crystal, Meth, Crank, Crink, Cris, Christian, Speed, Bombidos, Bottles, Amped, Jugs, Cross Tops.
 Artillery - Equipment for injections
 Baby - A girl
 Bad Go - To have bought an inferior quality of drug
 Bag - A job
 Bag - A container of drugs
 Barbiturates - Barbs, Candies, Peanuts, Pills, Purple Hearts, Sleeping Pills, Softballs, Blues, Blue Birds, Blue Bullets, Blue Devils, Blue Dolls, Blue Heavens, Double Trouble, Blue Tips, Rainbows, Reds and Blues, Nimbies, Yellows, Yellow Bullets, Yellow Jackets, Pinks, Reds, Red Birds, Red Bullets, Red Devils, Seccies, Seggies, Phenpies.
 Barbs - Barbiturate drugs
 Bash - Marijuana
 Beast - LSD
 Bennie - An amphetamine drug
 Bernice - Cocaine
 Bhang - Marijuana
 Big D - LSD
 Bindle - A small quantity or packet of narcotics
 Birdseye - A small amount of a narcotic
 Black Columbus - Marijuana
 Black Mote - Marijuana cured in sugar and honey
 Blank - Poor quality heroin
 Blank - Equipment for injections
 Blast Party - A company of marijuana users
 Blow a Vein - Unsuccessful attempt to puncture a vein
 Blue Birds - Amobarbital
 Blue Bullets - Amobarbital
 Blue Devils - Amobarbital
 Blues - Amobarbital
 Blue Heavens - Amobarbital
 Blue Tips - Amobarbital
 Bombers - Marijuana cigarettes
 Bombidos - Injectable methamphetamines
 Boast - To obtain, steal
 Boot - To prolong the injection by advancing the plunger slowly
 Bottles - Injectable methamphetamines
 Box - A metal container for marijuana
 Boy - Heroin
 Bread - Money
 Browns - Long acting amphetamines
 Bull Horror - The illusioned fear the cocaine dependent has of being observed by the police
 Bummer - A bad hallucinogenic trip
 Bundle - A small quantity or packet of narcotics
 Burned - To be cheated
 Burned - To be caught or arrested
 Burnies - Marijuana cigarettes
 Businessman's Trip - DMT
 Busted - Arrested
 Buzz - A drug induced "high"
 Buzz - An attempt to make a purchase
 C - Cocaine
 Caballo - Heroin
 Can - Car
 Can - Approximately 1½ ounces of marijuana
 Can - 3½ to 6½ ounces of heroin
 Candies - Barbiturates
 Candy - Cocaine
 Candy Man - Seller of drugs
 Cap - Capsule
 Cap - A quantity of heroin
 Carry Nation - Cocaine
 Cartwheels - Double scored amphetamine tablets
 Cat - A conventionally behaving person
 Cecil - Cocaine
 Chalk - Cocaine
 Charas - Marijuana
 Charge - Marijuana
 Chasing the Dragon - Heating heroin for injection,

- also inhaling heroin and a barbiturate through a straw
- Chicken - Afraid
- Chicken Out - To lose one's nerve
- Chief - LSD
- Chipping - Occasional use of opiates
- Chippy - One who takes drugs, but is not yet dependent on them
- Chira - Marijuana
- Christian - Methamphetamine
- Christmas Tree - Spansules containing an amphetamine and a barbiturate
- Churus - Marijuana
- Cigarettes - Marijuana cigarettes
- Cocaine - Bernice, C, Candy, Carry Nation, Cecil, Chalk, Coke, Coconuts, Corrine, Dust, Flake, Frisky Powder, Sniff, Snow, White Powder
- Cocked-up - To be under the influence of cocaine
- Coconuts - Cocaine
- Cod Cock - A codeine cocktail, a mixture, 8 to 12 ounces of over-the-counter medicines with small codeine content
- Coke - Cocaine
- Cold Turkey - To be undergoing withdrawal symptoms without drugs
- Come Hohe - To end a "high"
- Con - To swindle
- Connection - A dealer who is known to an addict
- Cook - To prepare heroin for injection
- Cook a Pill - To heat opium for smoking it in a pipe
- Cooker - A bottle cap or spoon in which heroin can be heated
- Cooks - Underground pharmacists who sell drugs without prescription
- Cool - To be indifferent, aloof
- To Cool - Not to get excited
- Cool Chippy - A not yet dependent drug user
- Cop - To get, obtain, steal
- Cop a Plea - To plead guilty
- Co-Pilots - Amphetamines
- Cop Out - To discontinue participation
- Copped Out - To be conscious, but showing no interest in one's surroundings
- Coral - Mickey Finn
- Corgy - Heroin
- Corrine - Cocaine
- Cowboy - An independent dealer
- Crackers - LSD
- Crash - To abruptly discontinue the use of a drug
- Creep - An obnoxious person
- Cris - Methamphetamine
- Crooker - A physician who sells drugs illegally
- Cross Tops - Amphetamine tablets
- Crutch - A marijuana cigarette holder
- Crystal - Methamphetamine
- Cubes - LSD
- Cut - To dilute a drug
- Cut up - To criticize, put down
- CWP - A marijuana cigarette holder
- Dead Time - To laze around
- Deal in Weight - To sell large amounts of drugs
- Dealer - A seller of drugs
- Deck - A quantity of heroin
- Deeda - LSD
- Dexies - Dextroamphetamine sulfate
- Dig - To like
- Dillies - An opium derivative
- Dime - Ten dollars
- Dirty - Possessing drugs
- DMT - Hallucinogen, "Businessman's trip"
- Dolly - Methadone
- Dope - Any narcotic
- Double Trouble - Amobarbital sodium and secobarbital sodium combined
- Downers - Depressant drugs usually the barbiturates
- Downs - Depressant drugs usually the barbiturates
- Down Trip - An unenjoyable or frightening trip
- Drag - A bad trip
- Dripper - Eyedropper used for an injection
- Dude - A fellow
- Dummy - Equipment for injection
- Dupe - To swindle, defraud
- Dust - Cocaine
- Dynamites - Amphetamines
- Eighth - 1/8 ounce of a drug
- Eye Openers - Amphetamines
- Fifteen Cents - Fifteen dollars
- Finger - To betray
- Fit - Equipment for injections
- Fix - An injection of a narcotic
- Flake - Cocaine
- Flash - A feeling of excitement or pleasure
- Flash - A quick jolt felt in the abdomen as the injected drug enters the blood stream
- Flashback - Spontaneous reoccurrence of an LSD trip without taking the drug
- Flat Time - Serving a prison term without parole
- Flea Powder - Inferior heroin
- Flunk Out - To start to use strong drugs
- Flush - A feeling of excitement or pleasure
- Footballs - Oval shaped amphetamine tablets
- Fours - Aspirin with codeine tablets
- Frajo - Marijuana
- Frantic Junkie Stage - Being badly in need of another injection
- To Freak - To hallucinate
- Frisky Powder - Cocaine
- Fruit - A queer; male homosexual
- Fuzz - A "high"
- Fuzz - A policeman
- Gage - Marijuana
- Ganja - Marijuana

- Garbage - Inferior heroin
 Gasket - A device attached to the dropper tip to prevent air from entering the vein
 Gee - Intravenous injection
 Geed-Up - Under the influence of narcotics
 Gee Heads - Paregoric users
 Geezer - Small amount of a narcotic
 Geronimo - Barbiturates dissolved in an alcoholic beverage
 Get High - To notice the drug's effects
 Get Off - To be at the end of a "high"
 Ghost - LSD
 Gig - A job
 Gong - An opium pipe
 Gong Beater - An opium smoker
 Goofballs - Sedatives, mainly barbiturates
 Goofers - Sedatives, mainly barbiturates
 Graduate - To start to use stronger drugs
 Grapes - Wine
 Grass - Marijuana
 Greenies - Oval shaped amphetamine tablets
 Grefas - Marijuana
 Greta - Marijuana
 Groovy - To feel good and well satisfied
 Guide - A person assisting and comforting an LSD taker during a trip
 Gun - Needle for injection
 Gun - One ounce of heroin
 Gungeon - Marijuana originating from Africa
 Guru - A person assisting and comforting an LSD taker during a trip
 H - Heroin
 Hag - An addict using large doses
 Hairy - Heroin
 Hang Out - To laze around
 Hang-Up - A handicap
 Hang-Up - To hallucinate frightening things
 Hard Stuff - Morphine, heroin or cocaine
 Hashish - Resin from *Cannabis sativa* (marijuana)
 Hay - Marijuana
 Head - A sensation of the drug's full effect, euphoria
 Head - A frequent user, especially of LSD or methamphetamine
 Headshrinker - A psychiatrist or psychologist
 Hearts - Amphetamines
 Heat - Police
 Heavy Bread - Much money
 Heeled - To possess drugs
 Helen - Heroin
 Hemp - Marijuana
 Heroin - Boy, Caballo, Corga, JeeGee, H, Hairy, Harry, Helen, Horse, Joy Powder, JoJee, Junk, Schmack, Schmeck, Shit, Scott, Scag, Skot, Tecata, White Stuff, Dope
 High - To notice the drug's effect
 Hike - A quick transaction
 Hip - Advanced in taste or attitude; sophisticated
 Hit - A single dose of a drug
 Hocus - Morphine
 Hog - Phencyclidine hydrochloride; hallucinogen frequently called "Peace Pill" and "PCP"
 Holding - To possess drugs
 Honeymoon Stage - Period when a heroin user is not yet dependent on the drug
 Hooker - A prostitute
 Hop Head - A drug dependent person
 Horse - Heroin
 Horse Heads - Amphetamine tablets
 Hot Shot - An injection of an impure drug or one of too high a dose
 Huffers - Glue sniffers
 Hustler - Female (prostitute)
 Hustler - Male (one who solicits for a prostitute)
 Hype - One who uses drugs by injection
 Icecream Man - A seller of opium
 J - A marijuana cigarette
 Jack - To prolong the injection by advancing the plunger slowly
 Jacking Off the Spike - Prolonging the injection by advancing the plunger slowly and allowing blood to reflow into the syringe
 JeeGee - Heroin
 Jive - To lie, cheat
 Jive - Marijuana
 Joint - A prison
 Joint - Marijuana cigarette
 JoJee - Heroin
 Joy Powder - Heroin
 Jugs - Injectable methamphetamines
 Juice - Hard liquor
 Junk - Heroin
 Junkie - A seller of drugs
 Keg - Kilogram of marijuana
 Kick - To overcome drug dependence
 Kick - A feeling of excitement or pleasure
 Kit - Syringe, needle, bottle cap, and cotton swab for injections
 Kite - One ounce of marijuana
 L.A. - Long-acting amphetamines
 Laydown - A place where opium is smoked
 Leach - To mooch off people
 Leaves - Marijuana
 Lhesca - Marijuana
 LL - Marijuana
 Lemonade - Poor quality heroin
 Lid - One ounce of marijuana
 Lip Proppers - Amphetamines
 Lipton Tea - Poor quality heroin
 LSD - A, Acid, Beast, Big D, Chief, Crackers, Cubes, Deeda, Ghost, Hawk-25, Sugar, Trips, Twenty-Five

Machine - Syringe, needle, bottle cap, and cotton swab for injections
 Magic Mushroom - Psilocybin
 Magic Pumpkin - Mescaline
 Mainline - Vein
 Mainline - To inject into a vein
 Mainliner - One who uses drugs by intravenous injection
 Majoun - Marijuana
 Man - A dealer known to an addict
 Man - A police officer
 Manicure - To prepare marijuana for use in cigarettes by removing stems, seeds and dirt
 Marathons - Amphetamines
 Marijuana - Acapulco Gold, Bash, Bhang, Black Columbus, Charas, Charge, Chicago, Green, Chira, Churus, Frajo, Gage, Ganja, Grass, Grefas, Greta, Hashish, Hasheesh, Hay, Hemp, Heat, J, Jive, Leaves, Lhesca, LL, Majouns, Mary Jane, Mezz, MU, Muta, Pot, Tea, Weed, Yesca, Gungeon (from Africa), Mexican Brown, Panamanian Red, Panatella, Meserole (the latter two coming from Central or South America), Sas Fras (North American, mild).
 Mary Jane - Marijuana
 Master Key - A sledgehammer used by the police to break down a door
 Meserole - Marijuana from Central or South America
 Mescaline - An alkaloid of the peyote cactus
 Meth - Methamphetamine
 Methadone - Dolly
 Methamphetamines - Crank, Crink, Cris, Christian, Meth, Bombidos, Bottles, Crystals, Jugs, Speed, Amped
 Meth Freak - A frequent user of methamphetamine
 Meth Head - A frequent user of methamphetamine
 Meth Monster - A frequent user of methamphetamine
 Mexican Brown - Marijuana
 Mezz - Marijuana
 Mickey - Chloral hydrate and alcohol
 Mickey Finn - Chloral hydrate and alcohol
 Miss - Failing to hit a vein
 Miss Emma - Morphine
 Mob - Professional gangsters
 Mojo - Morphine
 Mooch - Leach, beg
 Morphine - Dope, Hard Stuff, Hocus, Mary Ann, Miss Emma, Mojo, Morpho, White Stuff
 Morpho - Morphine
 MU - Marijuana
 Muggles - Marijuana cigarettes
 Mule - A boy who delivers narcotics
 Muscle - To inject intramuscularly
 Muta - Marijuana
 Nabs - Police

Narco - A narcotics detective
 Nickle Bag - 1/5 to 1/6 ounce of marijuana selling for five dollars
 Nickle Bag - Five dollars of heroin
 Nimbies - Yellow-colored barbiturates
 Nod - To experience relaxation after taking a drug
 O - Opium
 O.D. - An overdose
 Opium - O, Pen Yen, Tar; narcotic from which morphine is derived
 Outfit - Equipment for injections
 Pad - Room, dwelling
 Panama Red - Marijuana
 Panatella - Marijuana from Central or South America
 Panic - Scarcity of drugs
 Peace Pills - Phencyclidine hydrochloride; hallucinogen frequently called "PCP" and "Hog"
 Peaches - Amphetamines
 Peanuts - Barbiturates
 PCP - Phencyclidine hydrochloride; hallucinogen frequently called "Peace Pill" and "Hog"
 Pen Yen - Opium
 Pep Pills - Amphetamines
 Per - Medical prescriptions
 Peter - Chloral hydrate
 PG - Paregoric
 Piece - One ounce of marijuana
 Piece - One ounce of heroin
 Pill Poppers - Persons who use pills
 Ping the Pill - To knock off some of the powder from a heroin capsule to spare some for an extra dose
 Pinks - Secobarbital sodium
 Plant - An informer
 Playing the Girls - Using prostitutes for one's income
 Point - A needle for injection
 Pop - To inject
 Pot - Marijuana
 Pot Party - A company of marijuana users
 Prickly Feeling - Sensation of air entering a vein
 Probes - Discussions
 Purple Hearts - Barbiturates
 Pusher - A seller of drugs
 Put On - To tease, mock
 Quid - One dollar
 Rainbows - Secobarbital and amobarbital combined
 Rap - To discuss, talk
 Rap - To inform
 Rare - To inhale cocaine or heroin through the mouth
 Rash - A feeling of excitement or pleasure
 Rasp - To discuss, talk
 Rat - To inform
 Red Birds - Secobarbital sodium

- Red and Blues - Secobarbital and amobarbital combined
- Red Bullets - Secobarbital sodium
- Red Devils - Secobarbital sodium
- Roach - Butt of a marijuana cigarette
- Roses - Amphetamine
- Run - A limited period of drug taking
- Rush - The feeling when an injected drug enters the blood stream
- Sas Fras - North American marijuana
- Scag - Heroin
- Schmack - Heroin
- Schmech - Heroin
- Scott - Heroin
- Seccies - Secobarbital
- Seggies - Secobarbital
- Shit - Heroin
- Shooters - People who use drugs by injection
- Shooting Gallery - A place where heroin and amphetamine users convene
- Shoot-up - A series of cocaine injections continuously following each other, possibly lasting a few hours
- Short - A car
- Shrink - A psychiatrist or psychologist
- Sitter - A person assisting an LSD taker during a trip
- Skin Pop - To inject under the skin
- Skot - Heroin
- Sleeping Pills - Barbiturates that indicates the beginning of
- Sleepy Yen - Tossing sleep, initiating "cold turkey" withdrawal
- Snatch-and-Grab Junkie - An unreliable, not too honest seller of small quantities of heroin
- Sniff - Inhale a drug through the nose
- Sniff - Cocaine
- Snort - Inhale a drug through the nose
- Snow - Cocaine
- Sober Up - To be at the end of a "high"
- Softballs - Barbiturates
- Speed - Methamphetamine
- Speed Freak - Persons who use amphetamines frequently
- Speed Palace - A place rented by an organizer of methamphetamine parties
- Spike - A needle for injection
- Splash - An orgasmic sensation, frequently associated with a penile erection at the beginning of a methamphetamine injection
- Splints - Marijuana cigarettes
- Split - To leave
- Spoon - Two grains of heroin
- Sport of Gods - To inhale cocaine through the nose
- Spree - A period of continuous drug taking, drinking bout
- Squares - Conventionally behaving people
- Stack - A quantity of marijuana cigarettes
- Sticks - Marijuana cigarettes
- Stool Pigeon - An informer
- Stooly - An informer
- STP - A synthetic hallucinogen; initials stand for "serenity, tranquility, peace"
- Straight - Not using drugs
- Strawberry Tablets - Aspirin-sized, pink mescaline tablets
- Strung Out - Dependent on a drug
- Suey - Opium residue in an opium pipe
- Sugar - LSD
- Take Off - To be ready to inject
- Tar - Opium
- Tea - Marijuana
- Tea Blower - Marijuana smoker
- Tea Pad - A meeting room for marijuana smokers
- Tea Party - A company of marijuana users
- Tecata - Heroin
- Texas Tea - Marijuana originating from Texas
- Ticket Agent - A seller of drugs
- Thrill - A feeling of excitement or pleasure
- Tie - A tourniquet
- Tingle - A quick jolt felt in the abdomen at the entrance of the needle into the vein
- Toat - To smoke marijuana
- Tracks - Needle marks
- Travel Agent - A seller of drugs
- Trey - A selling weight of heroin
- Trip - Psychological and physiological sensations perceived after taking an hallucinogen, usually refers to the stronger hallucinogens
- Trips - LSD
- Truck Drivers - Amphetamines
- Turkey - Equipment for injections
- Turnabouts - Long-acting amphetamines
- Turned On - Involved with, under the influence of a drug
- Turn On - To start taking drugs
- Turn Someone On - To give another person a drug for the purpose of getting "high"
- Twenty-Five - LSD
- Ups and Downs - Stimulants and depressants
- Uppers and Downers - Stimulants and depressants
- Valley - Elbow flexure
- Vibes - Mystical sensations felt as vibrations
- Virgin State - Period when one is taking drugs, but is not yet dependent
- Wake-Ups - Amphetamines
- Wasted - Being conscious, but showing no interest in one's surroundings
- Weed - Marijuana
- Weekender - A person who takes drugs only on weekends
- Wheels - A car
- White Powder - Cocaine
- Whites - Double-scored amphetamine tablets

White Stuff - Heroin
 White Stuff - Morphine
 Wig - Mind
 Wig Out - To undergo a psychotic experience
 Wild Geronimo - Barbiturates mixed with an alcoholic beverage
 Wino - An alcoholic who prefers wine
 Wired - A dependent

Works - Syringe, needle, bottle cap, and cotton swab for injections
 Yellows - Pentobarbital sodium
 Yellow Bullets - Pentobarbital sodium
 Yellow Jackets - Pentobarbital sodium
 Yen Shee - Opium residue in an opium pipe
 Yesco - Marijuana

GOOD DRUGS HELP MAN

REDUCTION IN DEATH RATES (1)

It is estimated that more than 5 million Americans are alive today as a result of changes in the mortality rate since 1937. Death rates have been reduced by vaccines and drugs:

Poliomyelitis	75%
Acute rheumatic fever	83%
Syphilis	89%
Influenza	90%
Tuberculosis	91%
Measles	94%
Whooping cough	96%
Diphtheria	99%

STUDENT DIALOGUE ON THE USE AND ABUSE OF DRUGS

SECOND GRADE

These are some statements made by the pupils on the subject of drug abuse.

- (1) Sometimes drugs kill you.
- (2) People put it in candy and offer it to you.
- (3) Sometimes drugs can damage your brain.
- (4) It can make you do things like jump out of very high buildings.
- (5) A ten year old boy sniffed gas and died.
- (6) Drugs can make you go crazy.
- (7) Some people give themselves shots with drugs in them.

When asked to name some drugs or some slang names of drugs they named grass, marijuana, LSD, pot, red-devils, dope, and glue.

These are the questions they asked about drugs.

- (1) Where does it all come from?
- (2) What color is it?
- (3) Why do kids take drugs?
- (4) Do old people take drugs?
- (5) What will marijuana do to you?
- (6) How do drugs damage your brain?
- (7) Where do teen-agers get dope?
- (8) What kind looks like candy?
- (9) Can it kill you?
- (10) What can LSD do to you?
- (11) How do people make it?
- (12) Why do kids buy it from each other?
- (13) How does marijuana grow?
- (14) What does marijuana smell like?
- (15) What drugs are in medicine?

THIRD GRADE

1. How can you tell if a drug is poison?
2. Can an overdose of aspirin kill you?
3. Why are drugs bad for you?
4. What do uppers and downers do to you?
5. How can you tell drugs apart?
6. If people take drugs and die from them, why do others follow them and take drugs?
7. Can a person on drugs hurt others?
8. Is there a liquid dope?

9. Can drugs kill?
10. What is L.S.D.?
11. What are the names of drugs?
12. How can you tell if someone is on drugs?
13. How do drugs make your stomach cramp?
14. Where do drugs come from?
15. What kind of drugs are bad for you and what kind are good for you?
16. What is the worst kind of drug?
17. Why do people take drugs?
18. How do drugs hurt you?
19. Can doctors cure you from taking drugs?
20. In what countries are drugs legal?
21. Why do people make drugs?
22. What is heroin?
23. What kind of grass is grass?
24. What are red devils and yellow jackets?
25. How many people take drugs?
26. Why do they want to legalize pot?
27. Do some drugs make you dumb for life?
28. Why do people give drugs to kids?
29. How do drugs get into candy?
30. Why are there bad trips?
31. Why are drugs legal in some countries?
32. Do teenagers take more drugs than grown-ups?
33. If it is against the law, why do people take drugs?
34. How do poppy flowers make a certain kind of drug?
35. Who invented drugs?

THIRD GRADE (continued)

36. How does smoking pot hurt your brain?
37. Why do people take dope?
38. Are drugs made of different medicines?
39. Why did they make dope?
40. How does the hospital get the dope out of you if you take an overdose?
41. If drugs affect you, why are they made?
42. How do they make pot?
43. How does marijuana hurt your lungs?
44. How is marijuana made?
45. Can drugs sometimes catch on fire?
46. Can you mix drugs together and make some kind of drug that can harm you?
47. If you put dope in your bloodstream, what would happen?
48. If you had to take medicines, how can you be sure you are taking the right ones?
49. Where do they get drugs?
50. Where do you buy shot needles that you can shoot people with?
51. If there's pot in the world, and it was the only kind of food, what would happen to everybody?
52. What if people put pills or liquid over bread at night?
53. Why do some men buy drugs?
54. What if someone put drugs in your food, and you didn't know it?
55. Can too many drugs kill you?
56. Do some people take drugs just to be smart or big?
57. How do drugs affect your skin?
58. When people take dope, why do they think it is good for them even if it wasn't prescribed by a doctor?

THIRD GRADE (continued)

59. Why do people take drugs from strangers?
60. Why do some people feed it to their animals?
61. Why do they want to grow it in their yard?
62. What if someone threw drugs in a pond and a fish ate it; you caught the fish and ate it; what would happen?
63. Can drugs cause explosions?
64. Where do they get heroin?
65. What's the drug that you take using a needle? What's the liquid?
66. Could drugs make burns like acid go all the way through your body?
67. What kind of drug makes a dog paralyze?
68. How does dope paralyze you?
69. What medicine really harms you - makes you mean?
70. What about glue sniffing?
71. Can dope affect trees in any way?
72. Do they have machines that make dope?

FIFTH GRADE

List drugs that you know.

<u>HELPFUL</u>	<u>HARMFUL</u>	<u>(OTHER NAME)</u>
sleeping pills	LSD	Acid
Aspirin	Marijuana	Pot
tranquilizers	Heroin	Speed
LSD	Amphetamines	Grass
	Glue	White Fuzz
	Too many sleeping pills	Weed
	Too many Aspirin	Dope
	STP	

FIFTH GRADE (continued)

QUESTIONS:

1. How many kinds of dope are there? How help or harm you?
2. How many make you mentally ill?
3. What is L.S.D.?
4. How many colleges have pushers?
5. What is pot?
6. What is marijuana?
7. How does dope affect you?
8. Would one dose of sleeping pills kill you?
9. Why do people use them?
10. How do they get dope? (Where are they sold?)
11. Do most people with long hair use dope?
12. What does L.S.D. look like?
13. What drugs are still a mystery?
14. What does Amphetamines do?
15. Why do kids take it?
16. Where is it grown in the states?
17. What good are harmful drugs?
18. How do you stop taking drugs?
19. Does L.S.D. help cure cancer?
20. What drugs are most harmful?
21. Can police stop the use of drugs?
22. What is the states view on drug users and pushers?
23. Is it true that a law has been passed where cafe's can not put sugar in jars?
24. What is in them that make people go crazy?
25. What do they look like?

FIFTH GRADE (continued)

26. Why can't the government stop the use of drugs?
27. Do you think if all who use drugs were put in one place they would stay there?
28. How long does it take to take affect?
29. Do you think that people who commit suicide are on drugs?
30. How can drugs be useful and harmful?
31. Can drugs kill you?
32. Why do people take drugs?
33. What is the fine for selling or taking drugs?

JUNIOR HIGH DRUG QUESTIONS

1. Can the smoking of grass affect the formation of a baby if both the parents or even one parent smoked it?
2. Can the smoking of Pot do any damage to the brain of the one who smokes it?
3. Do most drug users die from an overdose of drugs, or do they get killed in accidents while under the influence of drugs?
4. Can you become addicted to heroin if you take a small amount?
5. Do you think Pot or Grass will ever become legalized?
6. Can the continued use of cough syrup lead to the use of harmful drugs?
7. Where are the most common places that drug pushers go to push their drugs?
8. What is the most common age of kids that are caught with drugs?
9. Can Grass cause you to take LSD, heroin, ect., if you've never taken those drugs before?
10. I've heard a saying around school that you can buy a lid, what is a lid?

JUNIOR HIGH (continued)

11. If you're in a room where people are smoking Pot, can you be affected by this?
12. If you are pregnant and take pills, you don't know what kind, can you or your baby be affected by this?
13. Are pills from the medicine cabinet bad for you if you don't know what they are?
14. How long has drugs been misused in the United States and why do people take them?
15. What is Cold Turkey?
16. Why can't Pot be legalized?
17. Are some of the drugs the same as what doctors prescribe?
18. What are the after affects of hard stuff?
19. How do most people get on drugs?
20. If you were on other medication and you took acid what would the affects be?
21. Is it true that peanut butter will make you high?
22. Where does Pot usually grow?
23. If you mixed drugs what would happen?
24. Why don't we have stricter laws concerning drugs?
25. What country has the largest problem with drugs?
26. What part of the United States has the largest drug problem?
27. What is the largest misused drug in the United States?
28. How are drugs made and do all of them send you on a trip?
29. Can you ever completely get a drug out of your system after you've used it?
30. Why haven't drugs always been a problem in the United States?
31. Where are drugs coming from?
32. What should you do if your brother or sister gets on drugs?

JUNIOR HIGH (continued)

33. How much does 1 oz. of Marijuana cost?
34. How would you help someone who is on drugs?
35. Can parents really tell when their kids are on drugs?
36. Can parents drive their kids to taking drugs?
37. Can parents be too concerned?
38. Why did they let drugs get into the hands of military men?
39. How is death caused when barbiturates are used with alcohol?
40. Why do scientists make drugs when they know that they are harmful?
41. Is pot harmful? If so, can doctors prove this?
42. Can heroin be taken in any way other than shooting it into the veins?
43. Why do people take drugs?
44. Does plain ginger send you on a trip?
45. What are some names of drugs?
46. What is hash?
47. Do people who take sleeping pills go on to harder drugs?
48. Do stupid people like dope?
49. What are drugs?
50. Can you get high on drugs?
51. Can drugs be harmful?
52. What would drugs do to you?
53. What is cold turkey?
54. Why is it always hippies that take drugs?
55. Where do drugs come from?
56. How many drugs kill you?
57. How do drugs get into illegal hands?
58. What is the difference between narcotics and non-narcotics?

JUNIOR HIGH (continued)

59. Why do most people take drugs?
60. Why do most people take non-narcotics?
61. Why do most of the pills hook you?
62. What do you think of narcotics?
63. What do sleeping pills do for you?
64. Is it true that after taking marijuana you won't have a hangover?
65. Why do they take red-devils?
66. Why are non-narcotics so dangerous?
67. How do people obtain drugs?
68. Does LSD damage chromosomes?
69. I read that they are using another drug to take people off heroin. Is it still experimental and what is it called?
70. Why do teenagers take drugs when they've seen films such as the one we saw today?

TEENAGE DIALOGUE ON THEIR CONCERNS REGARDING DRUGS AND THE USE AND ABUSE
OF THIS TOPIC BY THE CLASSROOM TEACHER

Do you think we need a drug education program?

I can see a lot of good points in it.

What did you learn about drugs?

I think we learned more about people than about drugs.

We learned that mescaline and acid were just about the same, and pot wasn't.

Glue sniffing is about the worst.

I think we learned more about ourselves than we did about drugs.

What about other people?

Trying to relate to other people is maybe more important than learning about drugs.

I liked the professor's talk on marijuana.

He was so truthful about it because he told the good and bad points.

It wasn't all factual. He was telling us about some other people that were "high" and I really learned a lot from him.

To me, drug education (for those who think they know everything) betters your knowledge and for those who are really dumb on the subjects; it will help them too.

We were talking about why there should be a drug education program.

I know that if I were in kindergarten I would want my teacher to know something about it so she could tell me some things.

But you don't really need it in kindergarten. You learn things like personal cleanliness and safety.

I'm just scared that someone is going to "blow it" and make it unnatural.

Learning follows a pattern and the teacher will throw in things that are completely unrelated.

The teacher has the opportunity to "blow" any subject she teaches.

I was talking to Nancy and she was talking about all the different teaching methods she hasn't had a chance to use because everything was so traditional and set in it's ways. This kind of a new program will give the opportunity to relate in a new way, and she was really enthused about that.

It's something new. This is just the first year and it will get better gradually.

This thing is like revising the system because you have to have time and you have to communicate.

I don't see how any patterns can be established.

Well, it already is.

It's like a train of thought that is putting emphasis on drug education, but I don't see how you can think that it is going to be so static and negative just overnight.

The teacher is going to have limitations. That's just the way the system is. The teacher can't get the subject out because of limitations--parents, the way the system is. The teacher has to have freedom if the subject is to be taught. You can't afford to teach this kind of education in a limited atmosphere. There has got to be honesty.

It's like sex education. The parents say that I'm not going to have my children learn this. If anyone tells them, I will tell them. And they are scared to tell them in the first place. They will say that they don't want their children to learn about drugs because they don't need to learn about

that. Some might say that it's a way of telling them how to get the stuff. It's the same with sex education. People are scared they are going to learn something that they are going to learn otherwise.

If they learn about it in class then they will experiment with drugs outside of class. So what difference does it make to learn it from a teacher and learn both sides of drugs or if you go out on the street and get it that way. That's why people want to teach drug education.

The system has got to be honest. They can't afford to work with these two types of subjects the way they have been working with other types of subjects. In history people can write anything they want and so with sex. But people know about sex.

You can't lie about it.

The answer lies in the teacher that is going to teach it. The teacher has any direction to go and I can see all kinds of freedom for the teacher. But there's going to be outside pressure. When a teacher is in a classroom, she can be honest.

There's a lot of other teachers that are scared to death and are influenced by the pressures. But systems don't tell you to lie.

The teacher will say, "There is nothing wrong with marijuana--no harmful effects." Then the kids will go home and tell their parents this and then the parents say "You told my kid that there is nothing wrong with marijuana."

I can't see how there is so much pressure on teachers so that they will be dishonest about it, and say this is bad because it is wrong.

I have seen so many of my teachers lie.

That's what I'm saying. She has the freedom to lie if she wants to, but if she wants to be honest, she can.

I think the teacher's job is to present the facts- both sides. If the kid hasn't learned right from wrong by the third grade, he's going to be in pretty bad shape.

The teaching won't make any difference. It is going to allow the kids to make up their mind if they don't know already. You can't have a course teaching morals.

You can't have a course saying that it is wrong to use heroin but right to use marijuana. Or to use all the drugs and get drunk every Friday night. Alcohol is a drug anyway.

It's worse than marijuana.

But it's legal.

We have got to find a way to get a perfect teacher.

But it's impossible to get a perfect teacher.

They have to be open-minded, ability to teach.

Who is going to determine if they are qualified or not?

What do we do if some teacher says that she wants to teach it, but aren't any of these things?

The students should make sure that they want this teacher.

But it might get to a point where we can't do that because then it might not be enough teachers to go around. A lot of teachers would be scared to teach.

Some teachers are not able to teach. They are too emotional and present only one side of the facts.

There are poor teachers everywhere, but they are still teachers.

Did you ever think about getting a doctor to come around one day a week.

Are you going to pay the doctor to do this?

They would know more about drugs than anybody else. They could tell you

exactly what happens when you take the stuff.

In writing the curriculum the teachers are trying to get experts to come.

Part of the program is the effects of drugs, the uses, the scientific data.

Then there are other aspects such as the social relevance of drugs. It isn't all scientific.

There would be other people involved such as the clergyman, doctor, psychologists.

What I think is so important is to get the kids to relate their ideas.

When we were at the university, we learned more about ourselves and how to communicate with other people and how to express your own ideas. In relating to other people, you can get to know yourself better. You can make more decisions better, and that is what the drug thing boils down to.

The student and teacher have to achieve this or they won't accomplish anything.

It's a whole new atmosphere where we can grow in it.

We grow with time with the pressures. I know in our groups it sometimes takes 45 minutes to warm up.

Once we got started we got really carried away. It takes at least 20 minutes to break the ice. It takes a pretty fantastic teacher to do this in 3 or 4 minutes.

You almost have to take the attitude that time is forever when you walk into the class.

Don't you just wish you could sit down on the floor and have a general rapp.

The way they just kind of stand up there and guide us--that was the most fantastic way to learn.

Did you learn more now than in the whole school year?

About drugs for sure.

I know that I learned a lot about drugs, about people, being yourself and truthful--being able to look people straight in the eye and telling them how you feel.

Are we able to get across to people about this kind of atmosphere?

Can people understand that it is neat to sit around and talk instead of being in a desk and being isolated?

I think that a lot of teachers already know this.

I think they do but are not strong enough to do anything about it.

I had a teacher who would group us in a circle, but it wasn't the same thing.

We had a rapp session where we talked about things going on in the school--not particularly about drugs. We didn't do it very often, and the teacher would only say something when ten people tried to talk at once.

You can get more done with five people in a group than thirty people sitting in a classroom.

It's hard when you have to teach so many people.

If this is done in class, the kids can get the hang of it so fast and there is always four or five leaders in the class. Once you get the hang of it, anybody can say how they feel.

This is where the time limits come in.

I know that it took our group two days to really get together and establish a trust in our group.

What do you consider the lowest grade level or lowest age that kids can get around like this and just talk?

Any age.

Can you imagine kids in kindergarten sitting around and talking about the poisons their parents take?

Kids are so use to being open anyway.

Kids are rally open, then they are conditioned to not say anything. By the time they reach the fifth grade, they are completly turned off and don't feel like turning on anymore. They have to hide how they feel. That's why people have a hard time relating to others.

The teacher should learn to guide the kids in kindergarten and help them.

We could learn so much if we could sit around in a group and ask each other

"Why am I getting involved in drugs?"

"Why am I interested in this?"

"What's pushing me there?"

When we can answer these questions for ourselves, we have grown a lot.

We were involved with the drug program at West Florida, but it just wasn't a drug program, it was a trip program. It was really beautiful. We went to classes, communications groups, saw films, talked to professors.

Some kids won't say what they want to about drugs because of the total atmosphere.

Some teachers say, "OK today we are going to talk about marijuana--any opinions?"

This happens all the time.

How do you get it to be open like we are here now?

At the university, one teacher told so much how she felt without anyone being there for security. Time was unlimited. We all felt like we were a family.

We said what we felt.

She presented a balance of sides. The information was there. We were real people.

I know that I learned more from these people then all the years of regular school.

You got to think about the kind of people that they were though.

Even if the teachers were called by their first name for a week, the formal procedure took place after that week.

We aren't talking about drugs, drug education, but the whole system.

You can't talk about drugs and then not about other things.

You can't talk about drug education without talking about education itself.

Do you realize that when we talk about drugs, the whole system has to be revised.

How do you feel about drug education?

I don't think they should start it until about the seventh grade.

In kindergarten the teacher starts not with drug education but with safety.

They are not going to jump right into heroin and all this.

They will gradually bring it in.

They start with the medicine cabinet and work on up.

In high school there will be a lot of discussions.

They are trying to organize a program where drug education starts in kindergarten and changes every year.

I know that I was so stupid when I went to the university. I thought "weed" was something you mow down on the ground. I didn't know anything.

In the education program, what would you want to see in the 12th grade?

I would want the truth presented.

The good and bad points should be presented.

The students probably know the difference anyway. The idea is to make us believe it. I took a course in health and only the bad was presented. That was silly. The teacher said, "The minute you drop acid you will be insane for the rest of your life." I know the good and bad so the whole thing is silly.

A lot of teachers will take pamphlets and read them and go from this. The pam-

phlets are a bad source because they only present the bad facts. The Medical Association has pamphlets that we read, and they were beautiful because they were so factual. There are good ones and bad ones. There are even commercials on drugs that are dumb. What about the pressure?

I know one teacher that got the students to write a paper on the good and bad effects of marijuana, and he almost got fired because parents called and said "You are teaching our kids about marijuana."

But the school can turn around and say that we are giving the objective viewpoint to the kids.

The teacher has to earn their "bread" and they can't be expected to tell lies. If a student goes up to a teacher and tells him that he has tried or uses some form of a drug, the teacher can't run to the administration.

What about the teacher in Tallahassee that got "busted"?

Some kids told her something and she didn't tell.

I never even heard of it until my cousin came back from Viet Nam with a big bag of grass.

My sister dropped acid for some many years so I'm really down on it.

There's so much on drugs. I don't know why marijuana is included, but I guess it is a drug.

Yeah, it is a drug.

I don't see a thing wrong with it except that it is illegal.

You don't get sick. Liquor and grass will make you sick. Mixing the two will make you out of your mind. I don't know why people are so down on it. On liquor people get sort of silly. On grass people just lay there.

No hangover.

Alcohol has been proven to be more dangerous than marijuana.

You get cirrosis from drinking.

They don't know that yet.

It took 2000 years to find out all about liquor, and it will take 2000 more to find out about marijuana.

I think that they should stop griping about grass.

Everything in Pensacola seem to start off with marijuana. Everything seems to begin there.

Then this is suppose to lead to hard drugs. That's all people talk about--marijuana.

People are naturally intelligent. They know about acid.

Like snorting speed. It makes your teeth rot and your hair falls out.

No it doesn't.

Yes, when you take an excessive amount.

A lot of people snort speed.

When you take speed, you have to wait awhile, but when you snort it--Wow.

It just hits them quicker.

I don't do anything except for grass.

I took a big dose of that when I was fourteen.

I took two hits of speed once.

I did them for a week in school. I didn't sleep.

If you get busted, you usually get about 7 years.

Then they put you in a place with criminals that are in for life.

A rehabilitation center is better than any prison any day.

Yeah, we said we wern't going to the university to get rehabilitated and yet we were.

Not brainwashed.

I was brainwashed to feel more honest about drugs.

I was myself.

The worse part is telling your parents about drugs.

My grandmother came to the house once. She had some nerve pills and I took some. They made me more nervous than before.

Even pep pills drive me up a wall. You have to keep going.

Some girl took some no-doz to stay up and study, but she got really sick.

Some six year old kid went in a store to buy some glue and they wouldn't even sell it to her.

Paint isn't hard to buy.

My brother started on glue.

Paint, glue--anything with that type odor is bad.

There are a lot of people who die.

People are going to somehow get some form of drugs.

Did you hear about the inflation. The price of grass is going up because it is so hard to get.

A dollar a joint?

Twenty-five for an ounce.

There is going to be a big wave of grass in September.

When you take acid or something, can other people tell?

Do you know that before you can take your driver's license test, you have to take a test to find out if you have taken drugs before.

There's no way.

In your blood.

People are dropping acid and speed now because that's all they can get.

A lot of people think that if grass were legalized, then people would stop doing so much acid.

They won't ever legalize acid.

They ought to perfect it.

When I'm drunk, I go fast but when I'm stoned, I go slow.

Do you know where the best place to smoke is? In a car.

A lot of people who smoke grass don't even smoke cigarettes.

A lot of stuff has soap in it. You know that it isn't pure stuff.

Acid is cut, so is grass.

People even do oregano.

I know one girl who got fined \$50.00 for calling a policeman a 'pig'.

The country is sort of communistic. It is going to 'pot'.

I'll smoke to that.

I think we should go through all of the drugs and say about each of them.

Drugs are nationwide.

They haven't proven that drugs can harm you physically.

It's just been that over the years that people have accepted that drugs are bad and that marijuana is a drug.

People put you down for it.

People have found no harmful effects. Why lie about it?

First graders now know a lot about marijuana.

When people said that they were going to cut weed, I thought that they were going to cut grass instead of buying it.

I didn't know about drugs until well after the seventh grade.

The younger kids now know more about it than we did when we were kids.

Are drugs a national problem?

Sure!

It isn't just a problem in any certain part of the United states but all over. Kids are more exposed today. They repeat things. They are being cool and they are new words. They want to impress other people when they use drugs. Now that we know that this problem exists, how do we cope with it?

Kids start learning K thru 5.

This is the time when the brainwashing should be or is.

People who use the slang words are identified with the hippy or drug users.

The facts should be presented so the people can make their own decisions.

The educational system knows how to expose the kids to drugs. Starting from the beginning and working up.

That's what we are trying to work up now--what the teachers are going to go by.

What kind of person do you want to teach you this?

I want a person who is openminded, who is willing to teach drug education, able to teach, emotional stable.

You don't want a teacher who says that drugs are bad or drugs are good.

Someone who is willing to teach and able to teach. Someone who wants to do this.

I want someone who is "in the know".

Teachers can teach what there is to teach.

Teachers couldn't say how they felt about it because the kid would go home and tell their parents.

But by listening to other opinions, you can judge your own values.

Do you want a teacher who can act as a leader or maybe as a listener?

A teacher that will act as a guide. A person who will start things off and then let the students go from there.

Some kind of analysis by the instructor is going to have to be made to find out where the students are at.

How should a teacher find out about her students?

I would go to a group of 5 students and ask how they feel about drug abuse.

I had rather that my kid know what chemicals not to handle and know about the things in my medicine cabinet.

Is something wrong with drug education?

It's hurting other people.

No, I'm not hurting anybody--maybe myself in some respect.

What does it do precisely to the body?

Why does it make you addictive?

What do you want to learn if you take a course in drug education?

To avoid becoming addictive without knowing it. I would like to know some of the drug names. To just become aware of what drugs are.

It should be offered every year and advance as you go along.

I've got some friends that say marijuana gives them a new insight towards a lot of things which is crazy.

FILMS ON DRUG PREVENTION

TITLE AND YEAR OF PRODUCTION	LENGTH IN MINUTES (color, unless stated other- wise)	TOPIC(S)	AUDIENCE	PRODUCER AND/OR DISTRIBUTOR(S)
Beyond LSD 1968	25	drugs in general	jr. & sr. high, adults	Bailey Film Associates*
The Chemistry of Marijuana	36 B&W	marijuana	adults	Indiana University*
The Circle 1967	57 B&W	heroin	adults	McGraw-Hill Films*
The Dangerous Drugs	22 color or B&W	drugs in general	jr. & sr. high, adults	Narcotic Educational Foundation of America*
The Distant Drummer 1968	66 (three parts)	marijuana, LSD, heroin methedrine	adults	National Institute of Mental Health*
Driving and Drugs	15	drugs in general	jr. & sr. high, adults	Modern Talking Pictures*
Drug Abuse: The Chemical Bomb 1969	19	marijuana, barbiturates, methedrine, glue, and delirants	jr. & sr. high, adults	Film Distributors International*

Addresses for organizations indicated by an asterisk () are given in Sources.

TITLE AND YEAR OF PRODUCTION	LENGTH IN MINUTES (color, unless stated other- wise)	TOPIC(S)	AUDIENCE	PRODUCER AND/OR DISTRIBUTOR(S)
Drug Abuse: One Town's Answer 1970	23	drugs in teen culture, communica- tion	jr. & sr. high, adults	AIMS*

NORTHWEST FLORIDA COMPREHENSIVE HEALTH PLANNING COUNCIL: Post Office Box 1349; Phone 434-2658; provides comprehensive health planning covering all factors in the Escambia-Santa Rosa County area.

NORTHWEST FLORIDA DIVISION OF ARTHRITIS FOUNDATION: 61 East Mallory; Phone 433-0585; research and education; financial assistance for medical care for patients unable to pay and referred by a physician.

PILOT DENTAL CLUB CLINIC: Post Office Box 1869; Phone 438-8571; Extension 40; emergency and routine restorative treatments, oral hygiene instructions and stannous fluoride treatments; eligibility required under qualifications of public law 89-10.

PUPIL PERSONNEL SERVICES, ESCAMBIA SCHOOLS: 5404 Lillian Hwy.; Phone 456-8631; coordinates school health problems.

ROSEMONT NURSING AND CONVALESCENT HOME: 1713 West Avery; Phone 434-2355; skilled intermediate, and ambulatory nursing facilities and convalescent care.

SACRED HEART HOSPITAL: 5151 North Ninth; Phone 476-7851; full range general hospital services.

SACRED HEART CHILDREN'S HOSPITAL: 5151 North Ninth; Phone 476-7851; peadiatric care.

SANTA ROSA HEALTH CLINIC: Milton, Fla.; Stewart Street; Phone 623-3859; Sanitary inspections; visiting nurses; indigent care abd services.

SANTA ROSA HOSPITAL: Milton; Phone 623-3631; general hospital services.

SOCIAL SECURITY ADMINISTRATION: 51 East Gregory; Phone 434-1073; provides assistance for persons wishing to file claims for retirement, survivor or disability benefits under the Social Security Act; handles Medicare claims.

SPECIAL EDUCATION, ESCAMBIA SCHOOLS: 5404 Lillian Hwy.; Phone 456-3631; speech therapy; pre-school classes; for deaf; teachers and classrooms provided to cerebral palsy center and crippled children's home; teachers for home-bound and hospitalized; services for visually handicapped mentally retarded and the emotionally disturbed or socially maladjusted child.

TUBERVILLE MEMORIAL HOSPITAL: Century; Phone 246-3435; privately owned hospital facility to be replaced by one built by Escambia County.

UNITED CEREBRAL PALSY: 2912 North E; Phone 432-1595; offers treatment and training for the cerebral palsied and those with multiple handicaps.

UNIVERSITY HOSPITAL: 1200 W. Leonard; Phone 432-7632; full range general hospital.

UNIVERSITY HOSPITAL OUT-PATIENT CLINIC: 1200 W. Leonard; Phone 432-7632; out-patient examinations and treatment for medically indigent patients of Escambia County. Local physicians donate their time to care for the indigents of the clinics.

UNIVERSITY OF WEST FLORIDA STUDENT HEALTH SERVICE: Campus; Phone 476-9500; provides pre-admission screening and outpatient services to students.

VETERANS ADMINISTRATION SOCIAL WORK SERVICE: room 309-D, Post Office Building; Phone 432-2788; assistance to disabled veterans and families.

VISITING NURSES ASSOCIATION: 2251 N. Palafox; Phone 438-8571; under written orders of patient's physician, skilled nursing care is given in the home.

WEST FLORIDA HEART ASSOCIATION: 61 East Mallory; Phone 433-4557; heart information services and guidance; research, education.

WEST FLORIDA TUBERCULOSIS AND RESPIRATORY DISEASE ASSOCIATION: 403 Brent Annex; Phone 438-4310; primarily education and research; transportation to TB hospitals.

DIVISION OF FAMILY SERVICES: 24 West Chase; Phone 433-1124; social services and financial assistance to dependent children, aged, blind, permanently and totally disabled, and other indigent children.

NORTHWEST FLORIDA CRIPPLED CHILDREN'S ASSOCIATION: 1005 West Avery; Phone 438-1626; nursing care, physical therapy, and other special services.

SCHOOL POLICIES ON DRUG ABUSE: A SUMMARY

An examination of school policies on drug abuse in fifty United States cities serves primarily to show that there is no one ideal method of handling the drug problem. Every community must develop its own drug abuse policy. The goals of the policy should be to stimulate the best possible use of area treatment services and to use local law enforcement facilities only when the problem is clearly legal rather than medical or social.

The growing use of drugs is not a problem created in the schools, nor can they solve it alone, but proper handling of drug abuse situations by administrators, teachers, guidance counselors and health personnel is essential. Once it is determined that the problem is one that requires psychological aid rather than just disciplinary action, educators should work out precisely how treatment referral and supervision for each student will be handled. The educators should then make every effort to ensure that the policy is understood by both the faculty and the student body.

The role of the school should be more than just to "call the police and expel the culprit," yet three times as many schools adopt this easy-way-out procedure rather than the more professional method of understanding that drug addiction is an illness which indicates an inability to deal adequately with certain social problems, and that its treatment should emphasize prevention and reform rather than discipline. Discipline is a tool, not an answer.

The following is not a school policy on drug abuse, but rather a set of suggestions extracted from the many different school policies used all over the country. The summary includes two sections: rehabilitation and discipline. The treatment section mentions how various school systems view the drug abuse problem and how they ensure that the student drug abusers receive the maximum benefit from all available rehabilitation facilities. The section on discipline deals with the school's role once it has been determined that the student drug abuser is not only doing harm to himself by using drugs, but is also effecting others, e.g., by having drugs actually in his possession in the school or by selling or exchanging them.

I. SCHOOL POLICY AND PROCEDURES RELATIVE TO PUPILS WHO APPEAR TO BE UNDER THE INFLUENCE OF NARCOTICS OR DANGEROUS DRUGS

A. Attitude (following the Stamford, Connecticut policy)

The school Health Service policy and procedures for treating and excluding pupils who appear to be under the influence of drugs are basically the same as are used for any other pupils showing signs of illness. In all such cases the school administrator must be notified.

The teacher's role is clear cut. If drug usage is suspected, the teacher should refer the student directly to the school nurse, where present, or to the principal. Make the action straightforward and objective. Do not give in to a panic reaction which would serve only to further alienate the student. Do not confront the student with any suspicions that the student may be under the influence of drugs. To repeat, the teacher's role in the case of suspicion is one of referral.

B. Treatment (for details consult the Stamford policy)

1. Confer with the principal. The proper form of therapy for the student should be decided on following consultation with the school nurse, guidance counselor, school psychologist and school social worker. If necessary, the principal should consult with the school doctor or school psychiatrist.
2. The principal will then ask the school psychologist or school social worker to advise the student that his parents (also family physician and/or minister if the student so desires) will be told of his need for medical and/or psychiatric treatment.
3. The parents will be urged to see to it that the student receives the proper therapy, but if the parents cannot be involved in helping the student, the case should be taken by the school social worker or school psychologist.
4. Based on the psychiatrist's recommendation, a decision should be made regarding whether or not the student should continue to be seen by the school social worker or referred for other services.

II. SCHOOL POLICIES AND PROCEDURES RELATIVE TO PUPILS BELIEVED TO BE POSSESSING, SELLING OR EXCHANGING DANGEROUS DRUGS

This is a legal matter and one cannot disregard the fact that the school and its students have no immunity from the laws regarding drugs. If a school system is to have a thorough and effective policy on drug abuse, there must be an effective relationship between the schools and the police. These two agencies may have to extend themselves more than they do at present. The schools must now withhold information from the police on legal matters. On the other hand, the police must be sensitive to the school's interest in the student's therapy, and must not act hastily without consultation with the school authorities. The life of the boy or girl must be paramount in the minds of the members of both agencies.

If the illegal possession or sale of narcotics and dangerous drugs is discovered by school officials, they should inform the police and cooperate with them in any subsequent investigation. The school should also provide the police with any information which would lead to a source of supply of illegal drugs. Responsibility for the welfare of the student, however, should not be relinquished by the school. For example, as soon as a student is positively identified as one who engages in drug traffic in the school, the principal will notify the parents. The understanding will be that the student must remain under the constant surveillance of school officials during school hours and of the parents while he is at home. At this point the principal will notify the police of the action he has taken.

The student will not ordinarily (discretion of principal) be suspended for his first offense. If a pupil becomes involved repeatedly of incidents of this kind, the principal shall refer him to the superintendent of schools for possible suspension.

If the illegal possession, sale or exchange of narcotics or dangerous drugs is discovered by police, the school will accept whatever legal conditions are imposed on the student by the authorities. Still, school officials should make every effort to become involved in the case. They should work with the family to encourage all rehabilitative efforts and referral to health care facilities.

Once school and police officials determine in which instance the latter will be called in to handle drug-abuse offenses, it will be the task of the school administrators and teachers to prove to the student that his welfare is the ultimate goal of all involved. The school officials must emphasize that they will stand behind and support the rights of all its students. This can be done by:

1. Recognizing a student drug-abuser as one who has displayed anti-social tendencies and who would benefit not by suspension or expulsion but by remaining in contact with the better-adjusted students. In this way some day-to-day control can also be exerted over him.

2. Allowing a student who has been apprehended by legal authorities for being illegally in the possession of--or in the presence of--harmful drugs to remain in attendance at the school.
3. Ensuring that in no instance will an administrator or teacher ask or encourage, or permit the police to ask or encourage, a student to act as an agent of the police in the purchase of drugs.
4. Respecting the civil rights of students, including the right to freedom from unreasonable search and seizure, at all times.
5. Enlisting the aid of members of the student body in helping to put together the policy best suited for the school they attend.

In short, the policy on drug-abuse, adopted and followed by each school, must be one that makes it possible for students to feel unafraid of coming forward and receiving treatment, even though the students may have participated in the illegal use, possession and/or sale of narcotics and/or dangerous drugs.

PITTSBURGH PUBLIC SCHOOL CURRICULUM BULLETIN: EXCERPTS

-----Role of the Educator-----

Educators are increasingly being called upon to do something about drug abuse. Proper handling of drug abuse situations by administrators, teachers, and guidance and health personnel is crucial. Accordingly, it is essential that all personnel be informed of the policy for administrative management of suspected drug abuse subscribed to by the Pittsburgh Public School system.

Drug abuse and its consequences are a major threat to the health, education and welfare of students. The management of this health problem at school is the responsibility of the principal or of his delegate. The administrative management, moreover, identifies this problem initially as a medical problem rather than a disciplinary one and, accordingly, requires a medical referral for each student to insure necessary medical supervision and follow-up.

Classroom teachers are important because they have many opportunities for close association with students due to their regular contact. Teachers are in a position to note significant changes in both the appearance and behavior of students, and they need to be thoroughly informed about drug abuse.

Teachers should be cognizant of the following:

- drugs and dangerous substances subject to abuse
- symptoms of drug abuse
- procedure for handling cases of suspected drug abuse
- legal controls governing drugs
- the desperate need for help and rehabilitation rather than a merely punitive approach.
- the necessity of giving objective, accurate information which avoids moralizing.

As key figures in the identification of pupil problems associated with drug involvement, teachers have a crucial role in the proper handling of such situations.

--Referral Procedure--

The most a teacher can do is suspect the possibility of drug abuse. Signs and symptoms observed may be indicative of some other medical problem. Referral of suspected drug abuse problems to the

school nurse where present or otherwise to the principal, must be a straight-forward, objective and professional action. A panic reaction expressed to the student or parent can only serve to further alienate the student. The teacher should not confront the student with any suspicions that the student may be under the influence of drugs. The teacher's role in the case of such suspicion is one of referral.

----Definitions of Drugs and Drug Abuse----

As commonly defined, a drug is any chemical substance other than food which when used produces a physical or mental change in the user. Although this defines the word "drug," the term "drug abuse" includes any state resulting from the ingestion by any route of an exogenous substance for any purpose other than its intended use.

Most drugs which are misused are also valuable to human welfare when properly prescribed and controlled. The problem arises when drugs are used illegally or unwisely.

Drugs liable to misuse may be broadly categorized as narcotics and non-narcotics. The latter includes the stimulants, depressants and hallucinogens.

----Drug Abuse as a Major Community Problem----

The multiplicity of the drug abuse problem has made it necessary to develop a position statement defining the role and the responsibilities of the educational institution as a member of the community. This position does not support any of the current medical or legal controversies pertinent to "dangerous or non-dangerous," "dependence or non-dependence," "narcotic or non-narcotic." Rather, this position supports the view that being under the influence of drugs precludes either on a temporary or permanent basis satisfaction of the educational potential of the individual. Accordingly, this definition seeks primarily preventive and therapeutic measures for this socio-cultural disease.

REPORT OF THE DALLAS AD HOC COMMITTEE ON DRUG ABUSE: EXCERPTS

----Guidelines for the Management of Drug-Using Students----

Although we feel it essential that the school system retain the capacity to respond flexibly to the individual problems of drug-using students, some guidelines appear to be needed. In evolving such guidelines, however, one faces a fundamental dilemma--namely, the relative degrees of emphasis to place upon the individual's rights and the rights of the group. The following guidelines are based upon a given student's arrest rather than conviction. This may represent an erosion of the right to be held innocent until convicted. If, however, guidelines were established on the basis of conviction (in cases of possession or sale) the not infrequent pre-trial delay could result in the exposure of the student body to an active source of drugs for months. We have resolved this dilemma by focusing upon arrest rather than conviction, but we are uncomfortable with its implications and urge the school system to explore further both alternatives with appropriate legal authorities. We recommend the following:

1. The student arrested for possession of drugs (first offense) should not be suspended if he and his family agree to fulfill certain conditions. These conditions should include the observance of whatever legal conditions imposed upon him by the legal authorities. In addition, the student and family must agree to participate in rehabilitative efforts if such are recommended.
2. The student arrested for possession of drugs (second offense) should be suspended until there is adequate evidence of rehabilitation. The same guidelines should apply to students arrested for the third or subsequent times.
3. The student arrested for the sale of drugs should be suspended until there is adequate evidence of rehabilitation.
4. The student found with drugs in his possession at school should be detained and the police and his family should be notified. If an arrest results, the student's case should be handled in accord with the principles outlined in the above sections.
5. The student who approaches a teacher or ombudsman for help with a drug problem should be assisted on the basis of the individual factors associated with his case. This will include encouraging the student's participation in rehabilitative efforts, and under most circumstances, notification of the parents and referral to a health care facility.

----Treatment Resources Within the Community----

It is the opinion of this Committee that available treatment resources could not cope with the magnitude of the problem which would be created if each drug-using student requested help. A wider spectrum of treatment services are needed, ranging from the care of acute drug crises to a diversity of outpatient and inpatient rehabilitative agencies. A variety of health care professionals should be involved. The overall treatment program, as a part of the delivery of general health care services would require enlargement of both public and private resources.

----Innovative Approaches to Treatment----

The Committee recommends that the Dallas Independent School District stimulate and support the development of new approaches to the treatment of drug-dependency. We feel that the people of Dallas should know that no available treatment program for severe drug-dependency of any sort yields consistently positive results. Because of this distressing fact, we urge the development of creative approaches with adequate devices to evaluate results as a central feature. The school system, through its Administrator of Drug Abuse Education, and guided by adequate professional consultation, should maintain an attitude of willingness to participate in innovative programs.

POLICY OF THE DUVAL COUNTY SCHOOL BOARD: EXCERPTS

Students that have been suspended for sale, use or possession of narcotics or other toxic drugs and are awaiting court action may be enrolled in a continuing school program provided by the School Board. Teachers will be assigned as needed in the continuing school program.

Students found guilty may be expelled or may be continued in a regular continuing school program, but may not be admitted to a regular school program within a semester.

ROCHESTER POLICY OF REPORTING AND PROCESSING DRUG USE CASES: EXCERPT

----Sale or Exchange of Drugs----

The school administrator will determine the advisability of police intervention. The school administrator will cooperate with the police in any investigation. In no instance will an administrator ask or encourage, or permit the police, in his presence, to ask or encourage a student to act as an agent of the police in the purchase of drugs.

EMERGENCY STATE BOARD OF EDUCATION REGULATIONS

6A-0.184 Drug Abuse Education

(1) Before the end of the school year 1970-71, all children and youth in kindergarten and in grades 1-12 shall have been provided instruction in drug abuse education. All juniors and seniors shall be required to complete units of instruction which will include, but not be limited to, basic concepts and instructional objectives prescribed in state courses of study and accreditation standards.

(2) Beginning with the 1970-71 school year, the division of elementary and secondary education shall conduct a series of regional clinics on drug abuse for professionals, para-professionals and personnel of non-school related agencies. Each school district shall enroll personnel qualified to instruct other district personnel in at least one of these clinics.

(3) Beginning with the school year 1971-72, drug abuse education shall become a regular and required unit of instruction in junior high school and at the senior high school levels. Such units will include instruction prescribed in state courses of study.

(4) Beginning with the school year 1971-72, school districts shall schedule, as a component of the staff development plan, training sessions designed to provide teachers with current information and knowledge of the harmful effects of drugs, narcotics, alcohol and tobacco and other immediate health related concerns.

(5) Beginning with the school year 1970-71, all teacher preparation institutions and junior colleges shall require drug, narcotic, alcohol and tobacco education as a major component of health education courses.

(6) Beginning with the school year 1971-72, all state supported teacher preparation institutions shall include instruction relating to drug abuse, alcohol and tobacco as a major component in health education courses required for certification of elementary teachers and for the preparation of drug and health education specialists.

(7) Beginning with the school year 1971-72, the board of regents, through the state university system, shall expand programs designed to develop specialists in health education and drug education with degree programs located in at least three regions of the State - South Florida, Central Florida and North Florida.

SUBJECT: Development of Drug Use/Abuse School Guidelines for
Educational Personnel Working with Students in
Elementary and Secondary Schools

The following guidelines were developed as a result of requests from local district personnel working with students in elementary and secondary schools of Florida concerned with drug use/abuse.

Educational personnel with the cooperation of the Ad Hoc Committee on Drug Abuse to the Florida Medical Association jointly conducted a series of meetings for the purpose of developing guidelines. The committees included representation from the Florida Medical Association, Department of Law Enforcement, Office of Attorney General, Florida Education Association as well as counselors from local school districts.

It is hopeful that these guidelines will be helpful to the local school districts in working with students.

Guidelines for School Personnel in elementary and secondary schools of Florida concerned with drug use/abuse.

Section A - Overview:

"The Police Power of the State cannot be diminished or compromised by school officials for a student. . .

"The possession or use of certain drugs is a serious violation of law and punishable by fine and/or imprisonment. A student is required to obey the same laws on school grounds as off. There is a distorted notion gaining widespread acceptance that a school or college is a sanctuary. These institutions are a part of society. Accordingly, the school authorities have the same responsibility as every other citizen to report violations of law. Students possession or using on school premises drugs prohibited by law should be reported promptly to the appropriate law enforcement officials. . . "The Reasonable Exercise of Authority, National Association of Secondary School Principals, Washington: 1969.

There are many students in our Florida schools today who need counseling about drug use/abuse but have many doubts as to what may occur and having such doubts do not seek assistance.

The school administrator, responsible for the total school operation, should use every resource to obtain the approval and adoption of these guidelines including the development of administrative practices and school board policies designed to enable teachers, counselors and other professional school personnel to function in a capacity which helps students cope with the problem.

Section B: The following guidelines are suggested for the consideration of Educational Personnel concerning students in elementary and secondary schools who seek counsel from school personnel about marijuana, narcotics, dangerous drugs or dangerous substances.

1. That a student approaching a teacher, counselor or other professional school personnel for help be free of humiliation, frustration, and fear of being searched by a security officer before counseling can take place.
2. That a student should be free from fear of administrative reprisal.
3. That students should be made aware that under Federal or State Statutes it is not a violation of the law to admit having used marijuana, narcotics, etc.

4. That it is not a violation for a teacher, counselor or other professional school personnel to counsel students about their personal drug use/abuse.
5. That the teacher must, of course, use discretion and judgement in a situation which may involve a violation of Federal, State, or Local Law.
6. That a student who requests help should be referred to a guidance counselor or other school or community resources offering to provide the needed help. Mutual acceptance is a prerequisite.
7. That parental involvement should be accomplished as soon as practicable without jeopardizing the achievement of professional assistance for the individual.

Section C: When a teacher observes behavioral changes in a student which may be due to emotional and/or physical problems including drug use/abuse existing school referral procedures should be utilized.

Florida Statutes on Drug Abuse

CHAPTER 71-107

Committee Substitute for House Bill No. 501 and
House Bill No. 458

AN ACT relating to drug abuse; amending chapter 404, Florida Statutes, by including cannabis among substances controlled by the Florida drug abuse law; providing that the crime of possession or delivery without consideration of cannabis, on the first offense, shall constitute a misdemeanor; providing for arrest upon probable cause for such crime; amending subsection (5) of section 398.10, Florida Statutes, to delete reference to cannabis therein; repealing subsection (12) of section 398.02, Florida Statutes; amending Section 398.02(13)(a), Florida Statutes to delete reference to cannabis therein; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Section 404.01, Florida Statutes, is amended by adding a new subsection, (12), to read:

404.01 Definitions.--For the purposes of this chapter:

(12) The word "cannabis" means all parts of the plant cannabis sativa, L., whether growing or not; the seeds thereof; the resin extracted from any part of such plant; and every compound, manufacture, salt derivative, mixture, or preparation of such plant, its seeds, or resin; but shall not include the mature stalks of such plant, fiber produced from such stalks, oil or cake made from the seeds of such plant, any other compound, manufacture, salt, derivative, mixture, or preparation of such mature stalks (except the resin extracted therefrom), fiber, oil, or cake, or the sterilized seed of such plant, which is incapable of germination.

Section 2. Subsection (1) of section 404.15, Florida Statutes, is amended to read:

404.15 Penalties.--Any person who violates any of the provisions of this chapter shall be punished as follows:

(1) For a first conviction, by imprisonment in the state penitentiary for not more than two (2) years or by fine of not more than one thousand dollars (\$1,000), or both; provided that if the first offense is the possession or delivery without consideration of not more than five (5) grams of cannabis, punishment shall be by imprisonment in the county jail for a period not exceeding one (1) year or by fine not exceeding one thousand dollars (\$1,000); provided, further, that for the purposes of this subsection, the word cannabis shall not include the resin extracted from the plant cannabis sativa, L., or any compound, manufacture, salt, derivative, mixture, or preparation of such resin.

CODING: Words in ~~struck through~~ type are deletions from existing law; underlined words are additions.

Section 2A. Subsection (1) of section 404.15, Florida Statutes, is amended to read:

404.15 Penalties.--Any person who violates any of the provisions of this chapter shall be punished as follows:

(1) For a first conviction he shall be guilty of a felony of the third degree, punishable as provided in sections 775.082, 775.083, and 775.084; by imprisonment in the state penitentiary for not more than 2 years or by a fine of not more than \$1,000, or both; provided that if the first offense is the possession or delivery without consideration of not more than five (5) grams of cannabis, he shall be guilty of a misdemeanor of the first degree, punishable as provided in sections 775.082 and 775.083, provided, further, that for the purposes of this subsection, the word cannabis shall not include the resin extracted from the plant cannabis sativa, L., or any compound manufacture, salt, derivative, mixture, or preparation of such resin.

Section 2B. In the event HB 935, introduced in the 1971 regular session of the legislature, is enacted into law, section 2 of this act will stand repealed and be omitted from the Florida Statutes. In the event HB 935 is not enacted into law, section 2A of this act will stand repealed and be omitted from the Florida Statutes.

Section 3. Chapter 404, Florida Statutes, is amended by adding a new subsection to read:

Notwithstanding any provision of the laws of this state relating to arrest to the contrary, a law enforcement officer may arrest without warrant, any person whom he has probably cause to believe is violating the provisions of this chapter relating to possession of cannabis.

Section 4. Subsection (5) of section 398.10, Florida Statutes, is amended to read:

398.10 Records.--

(5) The record of narcotic drugs received shall in every case show the date of receipt, the name and address of the person from whom received, and the kind and quantity of drugs received; the kind and quantity of narcotic drugs produced or removed from process of manufacture, and the date of such production or removal from process of manufacture; and the record shall in every case show the proportion of morphine, cocaine, or ecgonine contained in or producible from crude opium or coca leaves, and the proportions of resin contained in or producible from the dried flowering or fruiting tops of the pistillate plant cannabis sativa L., from which the resin has not been extracted, received or produced. The record of all narcotic drugs sold, administered, dispensed, or otherwise disposed of, shall show the date of selling, administering, or dispensing, the correct name and address of the person to whom, or for whose use, or the owner and species of animal for which sold, administered, or dispensed, and the kind and quantity of drugs, such correct name and address to be signed by the person or owner (in case of an animal) to whom narcotic drugs are delivered for the use of such person or owner. Every such record shall be kept for a period of two years from the date of the transaction recorded. The keeping of a record required by or under the federal narcotic laws, containing

substantially the same information as is specified above, shall constitute compliance with this section, except that every such record shall contain a detailed list of narcotic drugs lost, destroyed, or stolen, if any, the kind and quantity of such drugs, and the date of the discovering of such loss, destruction, or theft.

Section 5. Subsection (12) of section 398.02, Florida Statutes, is repealed.

Section 6. Paragraph (a) of subsection (13) of section 398.02, Florida Statutes, is amended to read:

398.02 Definitions

(13) (a) "Narcotic drugs" shall mean coca leaves, opium, isonipecaine, ~~cannabis~~ and every substance neither chemically nor physically distinguishable from them, and any and all derivatives of same, and any other drug to which the narcotics laws of the United States now apply.

Florida Statutes on Drug Abuse

CHAPTER 70-202

Committee Substitute for Senate Bills Nos. 349 and 634

AN ACT relating to education; providing for the drug abuse education act of 1970, establishing a program of drug, narcotic, alcohol and tobacco education; providing for the commissioner of education to administer the program pursuant to regulations of the state board of education; providing an appropriation; and providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Short title. -This act shall be known and may be cited as "The Drug Abuse Education Act of 1970."

Section 2. Definition. -As used in this act, the term "drug" shall include barbiturates, central nervous system stimulants, hallucinogenics, and all other drugs to which the narcotic and drug abuse laws of the United States apply. It shall also include alcoholic and intoxicating liquor and beverages, and tobacco.

Section 3. Purposes; intent. -The purpose of this act is to insure the development of a comprehensive drug abuse education program for all children and youth in kindergarten and grades one (1) through twelve (12). It is the legislative intent that this program shall teach the adverse and dangerous effects on the human mind and body of drugs and that such instruction shall be intensive and that it shall be given immediate emphasis, beginning with the 1970-71 school year. It is further the intent of the legislature that the voluntary services of persons from the professions of clergy, education, medicine, law enforcement, social services, and such other professionally and occupationally qualified individuals as can make a contribution to this program be utilized in its implementation so that the highest possible degree of expertise may be brought to bear.

Section 4. Administration of the comprehensive drug abuse education program. -

(1) The commissioner of education shall administer the comprehensive drug abuse education act of 1970, pursuant to regulations adopted by the state board of education. In administering this act the commissioner shall take into consideration the advice of the School Health Medical Advisory Committee of the Florida Medical Association, and is authorized to reimburse the members of this committee travel and per diem expense, as provided by law, when performing advisory services requested by the commissioner.

(2) Priorities for the implementation of this program shall include the following:

(a) The implementation of inservice education programs for teachers, administrators, and other personnel. Special emphasis shall be placed on methods and materials necessary for the effective teaching of drug abuse education. Inservice teacher education materials which are based on individual performance and designed for use with a minimum of supervision shall be developed and made available to all school districts. The "Triple T" or "Multiplier" concept shall be utilized in the implementation of inservice education programs in drug abuse education.

(b) Establishing resource centers located in various regions of the state for the purpose of assisting the department of education in coordinating drug abuse education activities in that region.

(c) Expand degree programs for the preparation of drug education specialists. Special attention shall be given to performance based criteria and to the development and articulation of appropriate drug abuse education courses at junior colleges.

(d) Design programs for the selection and training of school para-professional personnel and personnel of non-school health or health related agencies.

(e) Implementing the provisions of this act to insure that actual pupil instruction in drug abuse education will begin with the opening of the 1970-71 school year, as part of the curriculum of every elementary, junior and senior high school in this state.

Section 5. No teacher or school administrator employed by a non-public school shall be excluded from participating in inservice teacher education institutes or curriculum development programs conducted pursuant to this act.

Section 6. Any child whose parent presents to the school principal a signed statement that the teaching of disease, its symptoms, development and treatment, and the use of instructional aids and materials of such subjects conflict with the religious teachings of his church, shall be exempt from such instruction and no child so exempt shall be penalized by reason of such exemption.

Section 7. The state board shall adopt regulations to insure the teaching of drug abuse education to all pupils. Every district school system shall schedule drug abuse education courses a part of the curriculum of every elementary, junior, and senior high school.

Section 8. Nothing in this act shall be construed to authorize or require the teaching of sex education in any form.

Section 9. In implementing this act, every effort shall be made to combine funds appropriated for this purpose with funds available from all other sources, federal, state, local, or private in order to achieve maximum benefits for improving drug abuse education.

Section 10. The commissioner shall, at least thirty (30) days prior to the 1971 regular session and each regular session thereafter, transmit to the members of the state board, the president of the senate, the speaker of the house education committees a report as to the status of the drug abuse education program together with any recommendations for further improvement or modification.

Section 11. There is hereby appropriated from the general revenue fund to the commissioner of education for use in carrying out the provisions of this act the sum of seventy-six thousand four hundred dollars (\$76,400)

for the 1970-71 fiscal year which shall be added to and become a part of all other funds appropriated to the commissioner of education for the 1970-71 fiscal year.

Section 12. This act shall take effect July 1, 1970.

Approved by the Governor June 25, 1970.

Filed in Office Secretary of State June 25, 1970.

ANNOTATED BIBLIOGRAPHY

BOOKS AND BOOKLETS

- The Addict in the Street. Edited by Jeremy Lerner from tape recordings collected by Ralph Tefferteller. New York: Grove Press, Inc. 1964.
This book contains the first person stories of heroin addicts who live in constant threat of degradation, arrest and torture. It shows the wide gulf that exists between the addict's needs and desires and his own self-portrait.
- Alpert, R., Cohen, S., Schiller, L. LSD. New York: New American Library, 1966.
This book should help educators to obtain a balanced view of the present LSD controversy. Its pictorial presentations highlight the emotional nature of the LSD experience.
- Ausebel, David P. Drug Addiction: Physiological, Psychological and Sociological Aspects. New York: Random House, 1958.
This book contains many helpful insights into the various aspects of drug addiction.
- Blum, Richard H. and Associates. Utopiates: The Use and Users of LSD-25. New York: Atherton Press, 1964.
This book discusses the legal, social and psychopharmacological aspects of LSD as well as its use in many different settings.
- Chein, Isidor. The Road to H: Narcotic, Delinquency and Social Policy. New York: Basic Books, 1964.
A study of heroin use among different ethnical groups of teenagers in New York. This book distinguishes four stages in involvement with drugs; experimentation, occasional use, habitual use and regular use with efforts to break the addiction.
- Cohen, Sidney. The Beyond Within: The LSD Story. New York: Atheneum, 1964.
A discussion of good and bad "trips" caused by using LSD, this book is written by a psychiatrist who was one of the early investigators of the effects of LSD.
- Curtis, Lindsay R. Let's Talk About Drugs. Dallas: Tane Press, 1967.
Written concisely and using a question-answer approach, this booklet should appeal to youth. It discusses general aspects of marihuana and LSD abuse, glue-sniffing, as well as the misuse of barbiturates, amphetamines and tranquilizers.
- Drug Abuse: A Manual for Law Enforcement Officers. 2nd Edition, Philadelphia: Smith Kline and French Laboratories, 1966.
Although this manual is designed for law officers, in it there are several sections which could be quite informative to teachers, especially those sections which deal with drug groups subject to abuse, the drug abuser, the illegal traffic in dangerous drugs and the drug industry's security methods.

Drug Abuse: A Reference for Teachers. Trenton: New Jersey State Department of Education, 1967.

The Chapter on "The Role of the School" provides excellent suggestions for incorporating an attack on drug abuse in the school's program.

Drug Abuse: A Source Book and Guide for Teachers. Sacramento: California State Department of Education, 1967.

Although primarily designed for instructors in California, there are two excellent chapters on instruction in this source book. This guide also contains objective tests designed to measure the student's knowledge of drug abuse information.

Drug Abuse: Escape to Nowhere. Philadelphia: Smith Kline and French Laboratories, 1967. (Available from the National Education Association, Publication-Sales Department, 1201 Sixteenth St., N.W., Washington, D. C. 20036).

This excellent guide for educators discusses the drugs of abuse and their effects, the various methods of therapy for the drug abusers, the educational approaches that can be utilized and the problems of abuser identification.

Glaser, Daniel and D'Leary, Vincent. The Control and Treatment of Narcotic Use. Washington, D. C.: U. S. Government Printing Office, 1966.

This booklet discusses the physiological effects of narcotic drugs, historical and psychological factors involved in Narcotics abuse and the various types of treatment.

Harms, Ernest (ed.). Drug Addiction in Youth. Oxford: Pergamon Press, 1965.

This volume, the results of the efforts of persons who have worked with young drug addicts, covers many of the major aspects of juvenile drug addiction in an informative manner. Different authorities have contributed to this volume, writing on topics such as narcotic addiction among the newborn, psychopathology of drug addiction, and religion and narcotic addiction among juveniles.

Hollander, Charles (ed.). Student Drug Involvement. Washington, D. C.: United States National Student Association, 2115 S Street, 20008, 1967.

This publication deals with the history, sociology, psychopharmacology and legality of drug use as well as the student drug involvement.

International Control of Narcotic Drugs. New York: United Nations Publications, 1965.

This booklet describes the methods and scope of international narcotics control, the history leading to the present system of control, the types of drugs under international control and the suppression of illicit traffic in narcotic drugs.

Kolb, Lawrence. Drug Addiction: A Medical Problem. Springfield, Illinois: Charles C. Thomas, Publishers, 1962.

This book's purpose is to increase the reader's understanding of drug abuse and to encourage development of control and treatment programs. The whole book attempts to point out that drug abusers should not be treated as hardcore criminals, false propaganda should stop and drug dependency should be treated as a health problem.

Kreig, Margaret. Black Market Medicine. Englewood Cliffs, N. J.: Prentice-Hall, Inc., 1967.

This book reveals the people who produce and distribute illegal pharmaceuticals, as well as affording a view of many of the undercover activities involved with drug abuse control.

Kreig, Margaret B. Green Medicine. Chicago: Rand McNally and Company, 1964.

This book discusses the scientific interest in medicinal plants and the research in both laboratory and jungle for botanical drugs that cure.

Lindesmith, Alfred R. The Addict and the Law. Bloomington: Indiana University Press, 1965.

By presenting relevant materials of an historical and a current nature, the author discusses issues involved with addiction and the law.

Lin-Fu, Jane S. Neonatal Narcotic Addiction. Washington, D. C.: Children's Bureau, 1967.

This booklet contains a summary of information available on neonatal narcotic addiction, based on a review of literature.

Livingston, Robert B. Narcotic Drug Addiction Problems. Proceedings of the Symposium on the History of Narcotic Drug Addiction Problems, March 27 and 28, 1958, Bethesda, Maryland. Washington, D. C.: U. S. Government Printing Office, 1958.

While reading this book, the reader must remember to keep the content in historical perspective. Some of the material gives quite a good insight into various facets of the drug addiction problem.

Louria, Donald B. Nightmare Drugs. New York: Pocket Books, Inc., 1966.

Written by a physician, this paperback discusses stimulants, heroin, sedatives, tranquilizers and hallucinogens, as well as addiction and the laws.

Matthews, Jay De. Narcotics Legislation: Its Effects on Narcotics Traffic. Elizabethtown, Pennsylvania, 1968. Unpublished work.

A student's study of the effect of legislation on the narcotics traffic.

Maurer, D. W. and Vogel, V. H. Narcotics and Narcotic Addiction. 3rd ed. Springfield, Illinois: Charles Thomas, Publishers, 1967.

This book is an attempt to describe the various drugs of addiction and to report on the physiological effects of these drugs. Some generalizations are made in reference to the social implications of addiction.

Medicinal Narcotics. Washington, D. C.: Pharmaceutical Manufacturers Association (1155 Fifteenth St., N. W. 20005), 1965.

This booklet describes the various governmental controls over narcotics, points out the cornerstone of medicinal narcotics control and stresses the need for uniformity in laws and terminology as the foundation for effective enforcement of regulations. Recommended for high school student use.

Mental Health Monograph 2. Narcotic Drug Addiction. Washington, D. C.: U. S. Government Printing Office, 1965.

Recommended for reading by high school students, this booklet covers many of the more important aspects of narcotics drug addiction.

Nowlis, Helen H. Drugs on the College Campus. Detroit: National Association of Student Personnel Administrators (Suite 405, 5440 Cass Avenue 48202), 1967.

This handbook, although it primarily applies to the use of drugs by college students, attempts to clarify some of the issues and implications involved with drug abuse.

Prevention and Control of Narcotic Addiction. Washington, D. C.: U. S. Government Printing Office, 1966.

Discussion of the historical aspects of the control of narcotic abuse with a view toward establishing two points: (1) compulsory hospitalization of narcotic abusers (2) effective policing.

Psychedelics and the College Student. Princeton: Princeton University Press, 1967.

This booklet was written by college students for college students. Although the information is not presented from a professional viewpoint of psychedelics, it does point out that the drug question can no longer be avoided.

Psychosocial Aspects of Drug-Taking. Proceedings of a one day conference held at University College, London. Oxford: Pergamon Press, 1965.

Although this booklet discusses the drug dependency situation in England, some of the information on causes and motives of drug abuse and the role of education in preventing drug abuse may be helpful to the teacher.

Saltman, Jules. What We Can Do About Drug Abuse. Public Affairs Pamphlet No. 390. New York: Public Affairs Committee, Inc. (381 Park Avenue, South, 10016), 1966.

This booklet shows that the many-faceted problem of drug abuse calls for many solutions. It makes interesting as well as informative reading for students.

Services for the Prevention and Treatment of Dependence on Alcohol and Other Drugs. Fourteenth Report of the WHO Expert Committee on Mental Health. World Health Organization Technical Report Series No. 363. Geneva: WHO, 1967.

This report discusses the problems of dependence on drugs, the types of programs needed to combat drug dependence and the areas of research that still need to be explored.

Task Force Report: Narcotics and Drug Abuse. Washington, D. C.: U. S. Government Printing Office, 1967.

This report contains the findings and recommendations relating to narcotics and drug abuse made by the President's Commission on Law Enforcement and Administration of Justice in The Challenge of Crime in a Free Society. It also contains much information on mind-altering drugs relative to dangerous behavior and proposals for dangerous drug legislation.

Vogel, Victor H. and Virginia E. Facts about Narcotics and Other Dangerous Drugs. Chicago: Science Research Associates, Inc., 1967.

This booklet contains a storehouse of information on the different types of drugs and their effects. It is a good reference for students.

Wilkerson, David. Twelve Angels from Hell. Westwood, New Jersey: Fleming H. Revell Company, 1965.

This book illustrates the personalities of twelve different hard-core drug addicts and depicts the changes that occurred in their lives as a result of spiritual experiences.

Wilkerson, David, with John and Elizabeth Sherill. The Cross and the Switchblade. Westwood, New Jersey: Fleming H. Revell Company, 1963.

Although this book is not primarily concerned with drug abuse, it does afford the reader a view of the physical and emotional environment of the drug abuser in the "asphalt jungle." It also stresses the necessity for demonstrating love for the adolescents who abuse drugs.

Wilner, Daniel M. and Kassebaum, Gene C. (eds). Narcotics. New York: McGraw-Hill Co., 1965.

This volume discusses the problems of drug use from the perspective of an epidemiologic model of the interaction of host (drug dependent personality), agent (pharmacological substance abused) and the environment which promotes drug abuse.

Winick, Charles. The Narcotic Addiction Problem. New York: The American Social Health Association (1790 Broadway, 10019), n.d.

This booklet is a statement of the narcotic addiction problem in the United States and a brief presentation of the program that the American Social Health Association has initiated in order to combat drug abuse.

Winick, Charles and Goldstein, Jacob. The Glue Sniffing Problem. New York: The American Social Health Association (1790 Broadway, 10019), n.d.

This booklet describes the practice of glue sniffing, its effects, its relationship to drug dependent and some etiological factors involved.

Yablonsky, Lewis. The Tunnel Back. New York: MacMillan and Company, 1965.

A description of Synanon's methods of treatment for drug addiction.

PERIODICALS

"Addicted!" Good Housekeeping. Volume 164 (May, 1967). pp. 12+

A personal narrative of a woman who became dependent upon diet pills. This article should assist the student in understanding the dangers involved in abusing prescription drugs.

Becker, Howard S. "History, Culture and Subjective Experience: An Exploration of the Social Bases of Drug-Induced Experiences." Journal of Health and Human Behavior. Volume 8, Number 3 (September, 1967), pp. 163-76.

This article develops a model based on cultural and social organization in an effort to explain the incidence of drug-induced psychoses, especially as related to LSD and marihuana.

Bewley, T. H. "Some Social, Psychological and Environmental Factors Associated with Drug Dependence." The Health Education Journal. Number 26 (May, 1967). pp. 60-66.

This article discusses the social organization of drug taking, the personalities of addicts, the environment of addicts and the relationship of drug addiction to delinquency.

Bloomquist, Edward R. "Let's Think Twice About 'Free' Narcotics." GP. Volume 21, Number 5 (May, 1960) pp. 156-62, and Volume 21, Number 6 (June, 1960) pp. 149-55.

These two articles attack the idea that "free" narcotics should be distributed to addicts. A comparison is made between the so-called "British System" and the American way of handling addicts.

Bloomquist, Edward R. "What Makes Teens Try Dope?" Parents' Magazine. (February, 1960). (Reprint available from Parents' Magazine, 52 Vanderbilt Avenue, New York, N. Y. 10017)

This article describes methods parents can utilize to help their children avoid drug abuse.

Brill, Henry and Larimore, Granville W. "Second On-Site Study of the British Narcotic System." NACC Reprints. (June, 1967).

This booklet points out the current situation on drug addiction in Britain and the modifications that are occurring in the "British System."

Brill, Leon. "Drug Abuse as a Social Problem." International Journal of the Addictions. Volume 1, Number 2 (June, 1966).

This paper highlights the sociological parameters of the addiction problem as well as the dramatic changes in perspective which have occurred in recent years.

Brodsky, Phillip. "Drug Plant Inspection." FDA Papers. (May, 1967) pp. 7-14.

This article describes what an FDA inspector looks for when he is inspecting a pharmaceutical manufacturing plant.

Bulletin on Narcotics.

A bimonthly publication of the United Nations, New York. It depicts the narcotic problem on the international level.

Carner, Charles. "Surprise Inside: Strange Effects of Drugs." Today's Health. (April, 1967) pp. 57-59+

This article points out how drugs purchased OTC (over-the-counter) can lead to serious complications for persons who misuse them.

Caruanta, S. "Drugs"—A Social, Medical or Educational Problem?" The Health Education Journal. Volume 25 (November, 1966) pp. 184-91.

This article discusses the various types of drug dependence, the personality of the drug-taking adolescent, the various groups of drugs abused and the role of health education in preventing an actual drug abuse situation.

Casselmann, Bernard W. "You Cannot Be a Drug Addict Without Really Trying." Diseases of the Nervous System. Volume 25 (March, 1964) pp. 161-63.

This article advocates seeking the causes of drug addiction so that preventive measures can be applied.

"Clinical Testing: Synopsis of the New Drug Regulations." FDA Papers (March, 1967) pp. 21-25.

An explanation of regulations involved with clinical testing of new drugs.

Cohen, Allan Y. "Acid is Not as Advertised." American Red Cross Journal. Volume 44, No. 3 (December, 1967) pp. 18, 19.

A former associate of Dr. Timothy Leary explains why he stopped using LSD.

Cohen, Maimon M., Hirschborn, Kurt, and Frosch, William A. "In Vivo and In Vitro Chromosomal Damage Induced by LSD-25." The New England Journal of Medicine. Volume 277, Number 20 (November 16, 1967) p. 1043.

A report of a study which convinced the authors of this article that the use of LSD causes a higher incidence of chromatid breakage than the non-use of LSD.

Curtis, Lindsay R. "LSD." Listen. Volume 21, Number 2. (February, 1968) pp. 5, 6.

This article, written by a physician to young people, summarizes what is known about psychedelics.

Dalrymple, Willard. "A Doctor Speaks of Marijuana and Other 'Drugs'." Journal of the American College Association. (Reprinted by permission of University: a Princeton Quarterly, 1965). Volume 14 (February, 1966) pp. 218-22.

This article in the form of a dialogue, could be especially helpful and interesting to students. It discusses the relationship of drugs to the mental health of individuals and the community.

"Dependence on Amphetamines and other Stimulant Drugs." Journal of the American Medical Association. Volume 197, Number 12 (September 19, 1966) pp. 1023-27.

Prepared by the AMA Committee on Alcoholism and Addiction, this statement is one in a series on drug dependence.

"Dependence on Barbiturates and Other Sedative Drugs." Journal of the American Medical Association. Volume 193, Number 8 (August 23, 1965) pp. 673-77.

One of the series of statements regarding drug dependence, this article was prepared by the AMA Committee on Alcoholism and Addiction.

"Dependence on Cannabis (Marihuana)." Journal of the American Medical Association. Volume 201, Number 6 (August 7, 1967) pp. 368-71.

One of the series of statements regarding drug dependence, this article was prepared by the AMA Committee on Alcoholism and Drug Dependence.

"Dependence on LSD and other Hallucinogenic Drugs." Journal of the American Medical Association. Volume 202, Number 1 (October 2, 1967) pp. 47-50.

One of the series of statements regarding drug dependence, this article was prepared by the AMA Committee on Alcoholism and Drug Dependence and the Council on Mental Health.

Dole, Vincent P. and Warner, Alan. "Evaluation of Narcotics Treatment Programs." American Journal of Public Health. Volume 57, Number 11 (November, 1967) pp. 200-08.

This article points to the chaotic condition of the present system of reporting of narcotics treatment programs. It also contains a rather extensive selected bibliography on narcotic addiction treatment from 1960 to 1966.

"Drug Abuse." Journal of the American Pharmaceutical Association. Volume N58, No. 1 (January, 1968).

Much of this issue is devoted to drug abuse. The drugs of abuse, a history of drug abuse, psychotomimetic agents, and the pharmacist's role in drug abuse education are discussed. Several featurettes on drugs are also included.

"Drugs." Health Information Digest. Volume 11, Number 2 (July, 1967) pp. 78-87. Interesting highlights from 14 recent articles on many aspects of drugs such as: clinical impressions of drug abuses, legal actions against addicts and personality of the drug abuser.

"Drugs." World Health. (July, 1967) pp. 1-40.

An excellent pictorial portrayal of the problems associated with drug abuse on the international level. This article takes a comprehensive and quite interesting look at drugs. Recommended for senior high school students.

Drugs of Abuse. (Reprint from FDA Papers, July-August, 1967). Washington, D.C.: U.S. Government Printing Office.

Pictorial description of various types of stimulants, depressants and hallucinogens. It describes why the various drugs are taken and what symptoms an abuser would exhibit when under the influence of these drugs.

Eddy, Nathan B., Halbach, H., Isbell, Harris, and Seevers, Maurice H. "Drug Dependence: Its Significance and Characteristics." Bulletin World Health Organization. Volume 32 (1965) pp. 721-33.

A description of the various types of drug dependence and the rationale behind the use of the term "drug dependence."

Garrett, Dan. L., Jr. "Synanon: the Communiversality." Humanist. (September-October, 1965) pp. 185-89.

A vivid description of Synanon's philosophy, methods and psychology.

(Available from Synanon Foundation, Inc. 1351 Ocean Front, Santa Monica, California 90401).

Glatt, M. M. "Problems Common to Alcoholism and Drug Dependence." WHO Chronicle. Volume 21, Number 7 (July, 1967) pp. 293-302.

This article discusses the similarities between dependence on alcohol and dependence on drugs especially in respect to etiological and developmental factors.

Goddard, James L. "Criminal Abuse of 'Dangerous Drugs'." The Forensic Quarterly. Volume 41, Number 3 (August, 1967).

This article stresses that the drug abuse problem in the United States is not an easily solvable problem.

"Good Manufacturing Practice." FDA Papers. (April, 1967) pp. 22-25.

A description of FDA's activities to assure that good manufacturing practices are being implemented by pharmaceutical firms.

Harms, Ernest. "Remedies for Drug Abuse-Right and Wrong." Adolescent. Volume 11, Number 5 (Spring, 1967) pp. 1-4.

This editorial stresses the need to understand the world of youth in order to obtain a proper perspective on what should be done to eradicate the deep impulses which lead to drug abuse.

International Journal of Addictions.

A publication devoted to the scientific study of drug use and abuse. It is published semi-annually by the Institute for the Study of Drug Addiction, 680 West End Avenue, New York, N. Y. 10025.

Kleber, Herbert D. "Prolonged Adverse Reactions from Unsupervised Use of Hallucinogenic Drugs." The Journal of Nervous and Mental Disease. Volume 1, Number 4 (1967) pp. 308-19.

This article reviews some of the factors that have brought about the drug fad and present a report of five cases that have suffered adverse reactions from drug experimentation.

Kleber, Herbert D. "Student Use of Hallucinogens." Journal of the American College Health Association. Volume 14 (1965) pp. 109-17.

This study of 21 college students attempted to learn more about students who abuse drugs, the patterns of abuse, and the effects that abuse had on the students' lives. Some of the information is quite revealing about the students.

Lang, Irving. "Narcotics Legislation - A Total Approach." NACC Reprints (June, 1967) (From The Catholic Lawyer.)

A description of New York's attempt to deal with drug abuse on a massive scale.

Lasher, Lewis P. "LSD: The False Illusion." FDA Papers. (September, 1967).

A look at LSD from the viewpoint of one of FDA's Criminal Investigators. Some Characteristics of LSD users are described.

Levine, Jerome and Ludwig, Arnold M. "The LSD Controversy." Comprehensive Psychiatry. Volume 5, Number 5 (October, 1964) pp. 314-21.

The authors attempt to answer the question: do the purported dangers and risks associated with the use of LSD outweigh any benefits that could possibly be derived from it?

Listen, 1350 Villa Street, Mountain View, California 94040.

This journal of better living talks about smoking and drinking as well as narcotics and is designed primarily for young people.

Louria, Donald B. "Cool Talk About Hot Drugs." NACC Reprints. (December, 1967).
This article attempts to peel away some of the misconceptions about LSD, marihuana and heroin. It is highly interesting and should be especially useful to high school students.

Lyle, David. "The Logistics of Junk." Esquire (March, 1965) pp. 59-67+.
A personal narrative of a drug addict coupled with information on the world-wide traffic in narcotics make this article quite captivating.

"Medicines and Your Family's Health." Second in a series published by the Pharmaceutical Manufacturers Association, Washington, D. C. 20005. Reader's Digest. Volume 92, Number 550 (February, 1968) pp. M1-M8.
The content in these pages describes some of the values of properly used drugs. Excellent reading material for secondary level students.

Mental Health Digest. National Clearinghouse for Mental Health Information. National Institute of Mental Health, 5454 Wisconsin Avenue, Chevy Chase, Maryland 20203.
Although this periodical reflects the whole spectrum of mental health and presents a broad sampling of subject matter and professional points of views, there are articles dealing with specific aspects of drug abuse.

"Misuse of Valuable Therapeutic Agents: Barbiturates, Tranquilizers and Amphetamines." A Report by the Committee on Public Health, the New York Academy of Medicine. Volume 40, Number 12 (December, 1964) pp. 972-79.
A study of the hazards of drug abuse with a review of historical approaches toward the problem as well as a list of remedies which can now be utilized to tackle the drug abuse problem.

"New Insights . . . Narcotic Addiction: Problems/Progress/Prognosis." Illinois Medical Journal. Volume 130, Number 4 (October, 1966).
This journal contains the proceedings of the Illinois State Medical Society's Conference on Narcotic Addiction. Many different aspects of drug abuse are discussed with a view toward finding the best in each and many conflicting ideas and synthesizing them into a constructive program.

"Prevention and Control of Drug Abuse: Statement of Needs and Principles." Social Health News. Volume 42, Number 7 (October, 1967) pp. 3-4.
These principles were adopted as a position paper by the Board of Directors of the American Social Health Association and serve as ASHA's guideline statements for program proposals for communities.

Radin, Sherwin S. "Psychosocial Aspects of Drug Addiction." The Journal of School Health. Number 36 (December, 1966) pp. 481-87.
This article attempts to answer some of the questions related to the psychosocial phenomena of drug abuse.

Rankin, Winton B. "National Drug Testing Center." FDA Papers. (May, 1967) pp. 4-6.
A description of a new approach to drug control.

Rehling, C. J. "Drugs and the Driver." Traffic Safety. (Reprint available from National Safety Council, 425 N. Michigan Avenue, Chicago, Illinois 60611).
A description of the ways in which narcotics, barbiturates, amphetamines, anti-histamines and tranquilizers can affect driving.

- Rosenhouse, Leo. "STP: A Deadly Trip." Listen. Volume 21, Number 2 (February, 1968) pp. 8, 9.
This article, written for young people, tells about the STP situation in San Francisco's Haight-Ashbury District. It also describes some physiological and social factors associated with STP abuse.
- Rosenthal, Theodore, Patrick, Sherman W., and Krug, Donald C. "Congenital Neonatal Narcotics Addiction: A Natural History." American Journal of Public Health. Volume 54, Number 8 (August, 1964) pp. 1252-62.
A discussion of the factors involved in congenital neonatal narcotic addiction and steps that should be initiated to control such situations.
- Ruskins, Arthur. "Drug Experience Reporting." FDA Papers (April, 1967) pp. 13-16.
A description of the new adverse reactions task force's operation and function.
- Sadusk, Joseph F., Jr. "Size and Extent of the Problem." Journal of the American Medical Association. Volume 196, Number 8 (May 23, 1966) pp. 707-09.
Discussion of diversion of non-narcotic drugs from legitimate to illegitimate channels.
- Samuels, Gertrude. "Where Junkies Learn to Hang Tough." Reprint from New York Times, (May, 1965). (Available from Synanon Foundation, Inc., 1351 Ocean Front, Santa Monica, California 90401).
This article describes the operation of Synanon and its approaches toward drug addicts.
- Schreiber, Flora Rheta and Herman, Melvin. "New Hope for Drug Addicts," Science Digest. Volume 60, Number 1 (July, 1966) pp. 15, 16.
Addicts can and do become useful members of society. Factors upon which successful recovery depends are discussed in this article.
- Selby, Earl and Anne. "Pills, Glue and kids: An American Tragedy," Reader's Digest. Volume 88 (June, 1966) pp. 66-70.
A "popular literature" article on juvenile drug abuse and ways to combat it.
- Skouse, Cleon. "The 'Instant Insanity' Drugs," Law and Order, Volume 15, Number 9 (September, 1967) pp. 83-87.
This paper describes the dangers of the abuse of LSD, as well as suggesting six steps to counter-attack the increasing prevalence of drug abuse.
- Smith, Jean Paul. "LSD: The False Illusion," FDA Papers, (July-August, 1967) pp. 10-18.
The LSD problem is presented from a psychologist's point of view in this article.
- The Attack on Narcotic Addiction and Drug Abuse. Albany, N. Y.: New York State Narcotic Addiction Control Commission, 12203.
A publication devoted to publicize the activities of the New York State Addiction Control Commission and to explain various aspects of drug abuse.
- Ungerleider, J. Thomas and Duke, D. Fisher. "The Problems of LSD 25 and Emotional Disorders," California Medicine, Number 106. (January, 1967) pp. 49-55.
A description of the physiological and psychological effects of LSD with information on the acute and chronic side effects noted among LSD users.

- Weech, Alexander A. "The Narcotic Addict and 'The Street,'" Archives of General Psychiatry, Volume 14 (March, 1966) pp. 299-306.
A study of the environment of the individual who is dependent upon drugs and the priority that peer activities have for him over family relationships.
- Winick, Charles. "Drug Addiction and Crime," Current History, (June, 1967) pp. 349-54.
An authoritative discussion of the illegal distribution system of drugs and the effects of treatment programs, as well as an attempt to answer the question: does crime antedate addiction?
- Winick, Charles and Bynder, Herbert. "Facilities for Treatment and Rehabilitation of Narcotic Drug Users and Addicts," American Journal of Public Health, Volume 57, Number 6 (June, 1967) pp. 1025-33.
This study attempted to determine the range and extent of existing programs for treatment and rehabilitation in the United States in respect to services provided and criteria of admission.
- Wylie, Evan McLeod. "The Pills Drivers Shouldn't Take," (Condensed for Family Safety) Reader's Digest, Volume 90 (February, 1967) pp. 83-85.
A description of the ways that many medicinal drugs, especially when combined with alcohol, can render an individual unfit to drive an automobile.
- Zellweger, Hans, McDonald, John, and Abbo, Gisela. "Is Lysergic Acid Diethylamide a Teratogen?" The Lancet, Volume 2 for 1967, Number 7525 (November 18, 1967) p. 1066.
This case report attempts to show a relationship between the use of LSD and birth deformity.

PAMPHLETS AND OTHERS

A Guide to Illicit Drugs. New York: American Social Health Association, N. D.

This chart describes the habit forming drugs, their slang names, their primary effects, their detection, and the dangers of abusing the drugs. It is quite compact and contains the basic information that a teacher should know about the various drugs.

Barbiturates as Addicting Drugs. (Publication of U. S. Department HEW, 1965 revised. Duplicated by and available from the Pennsylvania Department of Health).

This pamphlet points out the dangers of abusing barbiturates and the methods utilized to treat individuals who have taken too large doses of barbiturates.

Collection of Marihuana Papers. Bureau of Narcotics, 633 Indiana Avenue, N. W., Washington, D. C. 20226.
A collection of materials on different aspects of marihuana.

Drug Abuse: The Empty Life. Philadelphia: Smith Kline and French Laboratories, 1965.

A brief description of various types of drugs and some characteristics of drug abusers. Excellent as introductory reading material for students.

Drugs and People...About Unhealthy Dependence. Alcoholism and Drug Addiction Research Foundation of Ontario, 24 Harbord Street, Toronto 5, Canada.

This comic booklet gives an insight into why people abuse drugs. Because of its appeal, this booklet is excellent for students.

Fact Sheets 1-7. Washington, D. C.: Bureau of Drug Abuse Control, Food and Drug Administration, 1967.

These fact sheets provide information on the Drug Abuse Control Amendments of 1965, the illegal traffic in dangerous drugs, the drug abuser, depressants, hallucinogens, stimulants and controlled drugs. Good sources for non-technical facts.

Hooked. Information Materials Press, 25 W. 4th Street, New York, N. Y. 10036.

This comic booklet tells the story of what it is like to be hooked. Excellent for use with students because of its appeal.

Living Death: The Truth About Drug Addiction. Washington, D. C.: U. S. Government Printing Office, 1965.

This pamphlet contains many of the essential facts about drug addiction. May be used for student reading, especially as introductory material.

Patton, Tom. Some Notes on the Synanon Game. (Available from Synanon Foundation, Inc., 1351 Ocean Front, Santa Monica, California 90401).
A description of a method used to combat drug addiction.

Selected Publications on Drug Dependence and Abuse. American Social Health Association, 1740 Broadway, New York, N. Y. 10019.

A kit comprised of selected publications on drug dependence and abuse. Excellent resource material for teachers.

State of New York: Narcotic Addiction Control Commission (Kit), Executive Park South, Albany, New York 12203.

A kit comprised of information related to the control of drug addiction and the treatment and rehabilitation of drug addicts.
